

COHU^{INC}

2007 Annual Report

1-888-888-8888
1-888-888-8888

Company Profile

Cohu, Inc. ("Cohu") is a leading supplier of test handling solutions used by the global semiconductor industry as well as a supplier of closed circuit television and microwave communications equipment.

Financial Highlights

(in thousands, except per share data)

Operations:

	2007	2006
Orders*	\$214,594	\$273,352
Net sales*	\$241,389	\$270,106
Net income	\$7,978	\$17,681
Income per share:		
Basic	\$0.35	\$0.78
Diluted	\$0.34	\$0.77

Balance Sheet:

Cash, cash equivalents and short-term investments	\$170,118	\$147,916
Working capital	\$234,345	\$225,520
Total assets	\$340,379	\$326,339
Stockholders' equity	\$283,468	\$271,588

* Excludes discontinued metal detection equipment business that was sold in 2006.

Forward-Looking Statements

This Cohu, Inc. 2007 Annual Report contains forward-looking statements including expectations of market conditions, challenges and plans, within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and is subject to the Safe Harbor provisions created by that statute. These forward-looking statements are based on management's current expectations and beliefs, including estimates and projections about our industry. These statements are not guarantees of future performance and are subject to certain risks, uncertainties, and assumptions, including but not limited to, those discussed under the caption "1A. Risk Factors" beginning on page 8 of this Annual Report that could cause actual results to differ materially from those projected. Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the time they are made.

Cover photo: Close-up of the contactor indexing mechanism from Delta Design's Summit Test Handler. This high-speed mechanism incorporates proprietary thermal technology that precisely controls temperature of the IC during test.

Dear Fellow Stockholder,

In last year's letter to stockholders, I commented that conditions in the back-end semiconductor equipment industry were expected to remain challenging at least through the first half of 2007. In fact, driven by macroeconomic and semiconductor industry-specific factors, customers remained cautious with capital expenditures throughout all of 2007. The book to bill ratio for backend semiconductor equipment fell below 1.0 last August and has not yet returned to parity. In this weak business environment, Cohu's sales decreased 11% in 2007 and net income was \$8.0 million or \$0.34 per share compared to \$17.7 million or \$0.77 per share in 2006. Net income in 2006 benefitted from a \$3.0 million gain on the sale of our Littleton, Massachusetts facility. Orders were \$214.6 million in 2007 compared to \$273.4 million in 2006. Despite difficult business conditions, Cohu's balance sheet grew even stronger. Cash and investments increased to a record \$170.1 million and stockholders' equity increased to \$12.30 per share. Cohu paid quarterly cash dividends of \$0.06 per share in 2007 and has paid consecutive quarterly cash dividends since 1977.

Semiconductor test handling equipment, from our Delta Design subsidiary, represented 84% of sales. Microwave communications and CCTV equipment contributed 9% and 7% of sales, respectively.

Semiconductor Test Handlers and Thermal Systems

Delta Design, Inc. (Delta) develops, manufactures, sells and services test handling, burn-in and thermal solutions used by the global semiconductor industry in essential back-end manufacturing processes. Delta's customers include semiconductor device manufacturers (IDMs) and independent test subcontractors. Our equipment is used to automate the testing of the final, packaged integrated circuit (IC) and to thermally condition and control the temperature of the IC during back-end semiconductor testing processes.

Demand for thermal handlers was soft in 2007, though development and applications work on our large installed handler base continued at a high level in support of new products from our microprocessor customers. The reduced demand for thermal handlers was partially offset by sales of thermal sub-systems, a new product born in part from our 2006 acquisition of the Unigen business from Unisys. Thermal sub-systems maintain and control the temperature of the microprocessor during burn-in and system level test. These processes require the same type of thermal capability that is incorporated in Delta's thermal test handlers.

Despite a strong second quarter, when unit handler orders nearly doubled compared to the first quarter, conditions in our high-speed handler segment were weak in 2007. This part of Delta's business, driven primarily by ICs for consumer electronics applications such as mobile phones, is highly volatile, with frequent and significant changes to demand forecasts. Customers are moving to higher levels of parallel test and lower test times, creating a need for handlers with increased parallel test capability and faster index times to enable high utilization of the test system. Delta's product line is well positioned to address these requirements.

Last March, we were honored when Intel presented us with its prestigious Preferred Quality Supplier Award. This was the seventh consecutive year that Delta received a quality award from

Intel. While business conditions were difficult in 2007, we made important progress throughout the year that sets the stage for our continued growth, including:

- In the first quarter of 2007, we delivered initial pre-production units of an improved, second-generation thermal sub-system that is incorporated in an advanced burn-in and system-level test system. Production deliveries began in Q2 and the system was successfully qualified and accepted by the customer in the third quarter. Delta's strong portfolio of thermal-related intellectual property enables us to rapidly bring new products like this to market;
- Following a rigorous selection process, Delta was chosen over a competitor to develop the next generation thermal handler for one of our largest customers, a leading microprocessor IDM;
- We received the first orders from a large graphics IC manufacturer for Summit thermal handlers for use at its Asian test subcontractor's production facility. Whether testing microprocessors or high-speed graphics chips, Delta's proprietary thermal technology enables IC manufacturers to successfully test at the optimum speed, maximizing device ASPs and increasing their profitability. It's for this reason that Delta's thermal test handlers are used by the world's largest microprocessor companies and by other high-speed, high-power IC manufacturers;
- During Q3, one of our largest customers qualified an important upgrade to Delta's *EDGE* Handler that enables productivity improvements of up to 30%;
- As 2007 ended, we neared completion of a new handler that addresses the growing requirement for highly parallel, fast index time capability. Delta's new high speed handler is designed to test up to 32 devices simultaneously and to deliver high throughput in short test time applications. In December, this system was selected by a major U.S. based IDM, following an evaluation against a competitor's newest product;
- In the fourth quarter, another large U.S. IDM designated Delta's tri-temperature Castle high-speed handler as its plan of record production system for full temperature testing;
- To improve responsiveness to our customers and to further capitalize on favorable labor rates, in Q4 we began an expansion of our handler tooling manufacturing operation in the Philippines. Completion is expected in mid-2008 and will increase production capacity there approximately 50%.

Other Businesses

Operating results at Broadcast Microwave Services (BMS) and Cohu's Electronics Division were disappointing. We anticipate improved financial performance at each operation in 2008. In 2007, the Electronics Division completed and introduced new camera products for the security and surveillance markets that are expected to increase sales beginning this year. In March, 2007, BMS acquired Tandberg Television AVS, a competitor located near Frankfurt, Germany. AVS has high-definition (HD) microwave video transmission products that enhance and expand the BMS product line. HD is becoming an important competitive differentiator in the broadcast electronic news gathering industry and is increasingly a requirement in law enforcement

applications where high resolution is critical. We believe that AVS is an excellent acquisition that adds critical mass and provides complementary products and sales territories.

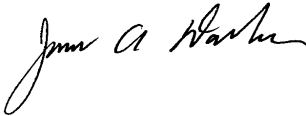

Prospects for 2008

The current macroeconomic environment is unfavorable and by all measures, 2008 is off to a rough start. We expect semiconductor equipment customers to remain cautious with capital equipment purchases over the near term. Throughout our operations, we are focused on making investments and taking actions to improve our competitiveness, reduce costs and improve our financial performance. We are optimistic and enthusiastic about the long-term prospects for our business, as new applications for semiconductors appear almost daily and unit volumes continue to grow. Our product line and customer relationships are strong and we are confident that Cohu will benefit as business conditions improve.

In June, 2007, long-time Cohu director and former CEO, James W. Barnes, passed away. I worked with Jim for over twenty years and appreciated his always helpful guidance and support. He is missed.

Finally, I want to thank our employees who continued to demonstrate the commitment and outstanding performance that has made us an industry leader. We look forward to the opportunity to grow Cohu profitably in 2008 and beyond.

Sincerely,

James A. Donahue
President and Chief Executive Officer
February 25, 2008

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 29, 2007

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
Commission file number 1-4298

COHU, INC.

(Exact name of registrant as specified in its charter)

Delaware

*(State or other jurisdiction of
Incorporation or Organization)*

95-1934119

(I.R.S. Employer Identification No.)

12367 Crosthwaite Circle, Poway, California

(Address of principal executive offices)

92064-6817

(Zip Code)

Registrant's telephone number, including area code: (858) 848-8100

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Name of Exchange on Which Registered</u>
Common Stock, \$1.00 par value	The NASDAQ Stock Market LLC
Preferred Share Purchase Rights, \$1.00 par value	The NASDAQ Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of voting stock held by nonaffiliates of the registrant was approximately \$378,000,000 based on the closing stock price as reported by the NASDAQ Stock Market LLC as of June 29, 2007. Shares of common stock held by each officer and director and by each person or group who owns 5% or more of the outstanding common stock have been excluded in that such persons or groups may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of February 12, 2008, the Registrant had 23,055,664 shares of its \$1.00 par value common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for Cohu, Inc.'s 2008 Annual Meeting of Stockholders to be held on May 13, 2008, and to be filed pursuant to Regulation 14A within 120 days after registrant's fiscal year ended December 29, 2007, are incorporated by reference into Part III of this Report.

This Annual Report on Form 10-K contains certain forward-looking statements including expectations of market conditions, challenges and plans, within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and is subject to the Safe Harbor provisions created by that statute. These forward-looking statements are based on management’s current expectations and beliefs, including estimates and projections about our industries. Statements concerning financial position, business strategy, and plans or objectives for future operations are forward-looking statements. These statements are not guarantees of future performance and are subject to certain risks, uncertainties, and assumptions that are difficult to predict and may cause actual results to differ materially from management’s current expectations. Such risks and uncertainties include those set forth in this Annual Report on Form 10-K under the heading “Item 1A. Risk Factors”. The forward-looking statements in this report speak only as of the time they are made and do not necessarily reflect management’s outlook at any other point in time. We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events, or for any other reason. However, readers should carefully review the risk factors set forth in other reports or documents we file from time to time with the Securities and Exchange Commission (“SEC”) after the date of this Annual Report.

PART I

Item 1. Business.

Cohu, Inc. (“Cohu”, “we”, “our” and “us”) was incorporated under the laws of California in 1947, as Kalbfell Lab, Inc. and commenced active operations in the same year. Our name was changed to Kay Lab in 1954. In 1957, Cohu was reincorporated under the laws of the State of Delaware as Cohu Electronics, Inc. and in 1972, our name was changed to Cohu, Inc.

We have three reportable segments as defined by Financial Accounting Standards Board (“FASB”) Statement No. 131, *Disclosures about Segments of an Enterprise and Related Information*, (“Statement No. 131”). Our three segments are: semiconductor equipment, television cameras and microwave communications. In May 2006, we sold substantially all the assets of FRL, Incorporated (“FRL”), which comprised our metal detection equipment segment. As a result of the divestiture of FRL, we are reporting FRL as a discontinued operation for all periods presented. All information presented in this Annual Report on Form 10-K covers results from our continuing operations.

The semiconductor equipment segment, operated under our wholly owned subsidiary Delta Design, Inc. (“Delta”), develops, manufactures and sells semiconductor test handling and burn-in related equipment and thermal sub-systems to semiconductor manufacturers and semiconductor test subcontractors throughout the world. The television camera segment (“Electronics Division”) designs, manufactures and sells closed circuit television cameras and systems to original equipment manufacturers, contractors and government agencies. Our other reportable segment Broadcast Microwave Services, Inc. (“BMS”), designs, manufactures and sells microwave communications equipment to television broadcasters, equipment manufacturers and government agencies.

Sales by reportable segment, expressed as a percentage of total consolidated net sales, for the last three years were as follows:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
Semiconductor equipment	84%	84%	87%
Television cameras	7%	7%	8%
Microwave communications	9%	9%	5%
	<u>100%</u>	<u>100%</u>	<u>100%</u>

Additional financial information on industry segments for each of the last three years is included on page 54 (Note 8 to the Consolidated Financial Statements).

Semiconductor Equipment

We are a worldwide supplier of semiconductor test handling systems, burn-in equipment and thermal sub-systems. Delta develops, manufactures, sells and services a broad line of equipment capable of handling a wide range of integrated circuit packages. Test handlers are electromechanical systems used to automate testing of the packaged

integrated circuit in the “back end” of the semiconductor manufacturing process. Testing determines the quality and performance of the integrated circuit prior to shipment to customers. Testers are designed to verify the performance of the integrated circuit, such as microprocessors, logic, DRAM or mixed signal devices. Handlers are engineered to thermally condition and present for testing, the packages that protect the micro-circuitry within the integrated circuit. The majority of test handlers use either pick-and-place or gravity-feed technologies. Delta's product line consists of pick-and-place handlers. The integrated circuit package type normally determines the appropriate handling approach. Gravity-feed handling is the preferred technique for handling packages with leads on only two sides, including the dual-in-line and small outline packages. In gravity-feed handlers, integrated circuits are unloaded from plastic tubes or metal magazines at the top of the machine and flow through the system, from top to bottom, propelled along precision track work by the force of gravity. After testing, the integrated circuits are sorted and reloaded into tubes or magazines for additional process steps or for shipment.

Integrated circuits with leads on all four sides, such as the quad flat pack or with balls or pads on the bottom of the package, such as ball grid array packages and certain low profile integrated circuits with leads on two sides, such as the thin small outline package, are predominately handled in pick-and-place systems. Pick-and-place handlers, use robotic mechanisms to move integrated circuits from waffle-like trays and place them in precision transport boats or carriers for processing through the system. After testing, integrated circuits are sorted and reloaded into designated trays, based on test results.

To ensure the quality of the integrated circuits produced, semiconductor manufacturers typically test integrated circuits at hot and/or cold temperatures, which can accelerate failures. Delta's test handlers are designed to provide a precisely controlled test environment typically over the range of -60 degrees Celsius to +160 degrees Celsius. In recent years, as the performance and speed of certain integrated circuits has increased, semiconductor equipment manufacturers have faced the additional and substantial challenge of dissipating the significant amount of heat that is generated within these high performance integrated circuits during the test process. This heat is capable of damaging or destroying the integrated circuit and can result in speed downgrading, when devices self-heat and fail to successfully test at their maximum possible speed. Device yields are extremely important and speed grading directly affects the selling price of the integrated circuit and the profitability of the semiconductor manufacturer. In addition to temperature capability, other key factors in the design of test handlers are cost, handling speed, flexibility, parallel test capability, system size and reliability.

Delta provides thermal sub-systems for use in advanced burn-in applications. These thermal sub-systems maintain and control the temperature of the integrated circuit during the burn-in testing process. Burn-in equipment is used in semiconductor manufacturing for quality control purposes. The burn-in process is used to stress devices for detection of early failures (infant mortality) prior to distribution. The burn-in process is also used by semiconductor manufacturers to develop reliability models of newly introduced devices. The objective of reliability testing is to determine a device's fault-free operation and estimated useful life by exposing the device to various electrical and thermal conditions that impact its performance.

Our products are complex, electromechanical systems, that are used in high-volume production environments and many are in service twenty-four hours per day, seven days a week. Customers continuously strive to increase the utilization of their production test equipment and expect high reliability from test handling and burn-in equipment. The availability of trained technical support personnel is an important competitive factor in the marketplace. Delta deploys service engineers worldwide, often within customer production facilities, who work with customer personnel to maintain, repair and continuously improve the performance of Delta's equipment.

Our Semiconductor Equipment Products

Delta offers products for the pick-and-place handler, and burn-in markets. We currently sell the following products in the semiconductor equipment market:

Pick-and-place

The Delta Castle is a pick-and-place test handler capable of thermally conditioning devices from -60 degrees Celsius to +160 degrees Celsius. The Castle can position from one to nine devices for testing. Its large thermal soak chamber provides a continuous flow of thermally conditioned devices to the test site allowing the handler to

process parts at high speed when running at temperature. The Castle incorporates an innovative vertical tray storage system that saves space on the test floor by minimizing the handler's footprint.

Delta's Summit series of pick-and-place handlers are designed to meet the requirements of manufacturers of microprocessors and other high speed, high power integrated circuits. The Summit handlers are designed around Delta's proprietary thermal control technology. The Summit PTC, or Passive Thermal Control, and ATC, or Active Thermal Control, models are designed to dissipate the heat generated during test and maintain the desired temperature of the device being tested.

The Delta *EDGE*TM is a pick-and-place handler that combines an economical design with a small footprint and fast index time (processing speed of the contactor placement mechanism). The *EDGE*TM handler is designed to meet the needs of integrated circuit manufacturers and subcontractors who test at ambient and hot temperatures.

Burn-in

Delta's VTS300, acquired from Unigen in 2006, is an automated burn-in system that is capable of processing numerous low power circuits simultaneously. The VTS300 supports asynchronous loading and unloading of devices without system interruption to transform the burn-in process from a traditional batch-oriented process to a more efficient continuous-flow process.

Thermal Sub-Systems

Delta has developed custom thermal sub-systems that incorporate our proprietary thermal control technology which are used by integrated circuit manufacturers to facilitate high performance burn-in and system level test. These thermal sub-system products maintain and control the temperature of the integrated circuit during the testing process.

Spares

Delta provides consumable and non-consumable items that are used to maintain, sustain or otherwise enable purchased equipment to meet or exceed its performance, availability and production requirements.

Tooling (kits)

Delta also designs and manufactures a wide range of device dedication kits that enable the handler to process different semiconductor packages.

Validation and Characterization

Delta's ETC 2000 is used in engineering and device characterization applications. The ETC 2000 conditions semiconductors to desired test temperature and maintains temperature set point by efficiently dissipating the heat generated during device test. The ETC 2000 uses the same thermal control technology as the Summit handler.

Sales by Product Line

During the three-year period ended December 29, 2007, sales of semiconductor test handler systems comprised approximately 56% of Delta's sales, thermal sub-systems approximately 12% and spares, tooling (kits) and service contributing the remaining 32%. During the same three-year period Delta's semiconductor test handler sales were comprised of approximately 99% pick-and-place handlers with the balance attributed to gravity-feed products.

Television Cameras

The Electronics Division has developed, manufactured and sold closed circuit television or CCTV cameras, equipment and systems for over 50 years. The customer base for these products is distributed among machine vision, traffic control and management, scientific imaging and security/surveillance markets. The current product line consists of a broad array of indoor and outdoor CCTV cameras and camera control equipment. Our primary products are high-performance, high-resolution cameras that meet the most demanding performance requirements and are resistant to harsh environments. To support its camera products, the Electronics Division offers accessories including monitors, lenses and camera test equipment.

Microwave Communications

BMS designs, manufactures and sells microwave communications equipment, antenna systems and associated

equipment. These products are used in the transmission of video, audio and telemetry. Applications for these microwave data-links include electronic news gathering, unmanned aerial vehicles (UAVs), law enforcement and security and surveillance. Customers for BMS' products include television broadcasters, entertainment companies, professional sports teams, military agencies, law enforcement and public safety organizations, and unmanned air vehicle program contractors, and other commercial entities.

Customers

Semiconductor Equipment

Our customers include semiconductor manufacturers and subcontractors that perform test services for semiconductor manufacturers. Repeat sales to existing customers represent a significant portion of our sales.

We rely on a limited number of customers for a substantial percentage of our net sales. In 2007, Intel, Advanced Micro Devices and Texas Instruments accounted for 27%, 28%, and 8%, respectively, of our consolidated net sales. In 2006, Intel, Advanced Micro Devices and Texas Instruments accounted for 25%, 23%, and 15%, respectively, of our consolidated net sales. In 2005, Intel, Advanced Micro Devices and Texas Instruments accounted for 45%, 13%, and 9%, respectively, of our consolidated net sales. The loss of, or a significant reduction in, orders by these or other significant customers, including reductions due to market, economic or competitive conditions or the outsourcing of final integrated circuit test to subcontractors that are not our customers would adversely affect our financial condition and results of operations and as a result, we believe that our customer concentration is a significant business risk.

Television Cameras

Our customer base in the television camera industry segment is diverse and includes end-users, government agencies, original equipment manufacturers, contractors and value-added resellers throughout the world. No single customer of this segment accounted for 10% or more of our consolidated net sales in 2007, 2006 or 2005.

Microwave Communications

Our customer base for microwave communications equipment is also diverse and includes government agencies, original equipment manufacturers, contractors and end-users throughout the world. No single customer of this segment accounted for 10% or more of our consolidated net sales in 2007, 2006 or 2005. In 2006 our microwave communications contract with the United Arab Emirates Armed Services ("UAE") was accepted and paid and, as a result, we recognized approximately \$7.9 million in revenue which in 2006 represented 32% of our microwave communications equipment segment sales and 3% of our consolidated net sales.

Sales and Marketing

We market our products worldwide through a combination of a direct sales force and independent sales representatives. In geographic areas where we believe there is sufficient sales potential, we generally employ our own personnel. We maintain U.S. sales offices for the semiconductor equipment business in Tyngsborough, Massachusetts; Chandler, Arizona; Austin, Texas and at Delta's Poway, California facility. In 1993, a foreign subsidiary was formed in Singapore to handle the sales and service of our test handling products to customers located in Southeast Asia. In 1995, a branch of the Singapore sales and service subsidiary was opened in Taipei, Taiwan. Sales in Europe, Japan and Korea are made primarily through independent sales representatives.

Competition

Semiconductor Equipment

The semiconductor equipment industry is intensely competitive and is characterized by rapid technological change and demanding worldwide service requirements. Significant competitive factors include product performance, price, reliability, customer support and installed base of products. While we are a leading worldwide supplier of semiconductor test handling equipment, we face substantial competition and there are a large number of competitors for a relatively small worldwide market. The Japanese and Korean markets for test handling equipment are large and represent a significant percentage of the worldwide market. During the last five years our sales to Japanese and Korean customers, who have historically purchased test handling equipment from Asian suppliers, have represented less than 5% of our total sales. Some of our current and potential competitors have substantially greater financial, engineering, manufacturing and customer support capabilities and offer more extensive product offerings than Cohu. To remain competitive we believe we will require significant financial resources to offer a broad range of products, maintain customer support and service centers worldwide and to invest in research and development of

new products. Failure to introduce new products in a timely manner or the introduction by competitors of products with actual or perceived advantages could result in a loss of competitive position and reduced sales of existing products. No assurance can be given that we will continue to compete successfully in the U.S. or throughout the world.

Television Camera and Microwave Communications

Our products in the television camera and microwave communications segments are sold in highly competitive markets throughout the world, where competition is on the basis of price, product performance and integration with customer requirements, service, product quality and reliability. Many of our competitors are divisions or segments of large, diversified companies with substantially greater financial, engineering, marketing, manufacturing and customer support capabilities than Cohu. No assurance can be given that we will continue to compete successfully in these market segments.

Backlog

Our order backlog as of December 29, 2007, was \$59.5 million as compared to \$86.3 million at December 30, 2006. Of these amounts, \$35.3 million (\$65.4 million in 2006) was in semiconductor equipment, \$5.9 million (\$5.8 million in 2006) was in television cameras and \$18.3 million (\$15.1 million in 2006) was in microwave communications. Backlog is generally expected to be shipped within the next twelve months. Our backlog at any point in time may not be representative of actual sales in any future period due to the possibility of customer changes in delivery schedules, cancellation of orders, potential delays in product shipments, difficulties in obtaining parts from suppliers, failure to satisfy customer acceptance requirements and the inability to recognize revenue under accounting requirements. Certain orders are subject to cancellation or rescheduling by the customer with limited or no penalty. There is no significant seasonal aspect to our business.

Manufacturing and Raw Materials

Our manufacturing operations are currently located in Poway, California (BMS and Delta), San Diego, California (Electronics Division), Tijuana, B.C. Mexico (Delta) and near Manila, in the Philippines (Delta). Many of the components and subassemblies we utilize are standard products, although certain items are made to our specifications. Certain components, particularly in our semiconductor equipment business, are obtained or are available from a limited number of suppliers. We seek to reduce our dependence on sole and limited source suppliers, however in some cases the complete or partial loss of certain of these sources could have a material adverse effect on our operations while we attempt to locate and qualify replacement suppliers.

Patents and Trademarks

Our proprietary technology is protected by various intellectual property laws including patents, licenses, trademarks, copyrights and trade secrets. In addition, we believe that, due to the rapid pace of technological change in the semiconductor equipment industry and our other business segments, the successful manufacture and sale of our products also depend upon our experience, technological know-how, manufacturing and marketing skills and speed of response to sales opportunities. In the absence of patent protection, we would be vulnerable to competitors who attempt to copy or imitate our products or processes. We believe our intellectual property has value and we have in the past and will in the future take actions we deem appropriate to protect such property from misappropriation. However, there can be no assurance such actions will provide meaningful protection from competition. Protecting our intellectual property rights or defending against claims brought by other holders of such rights, either directly against us or against customers we have agreed to indemnify, would likely be expensive and time consuming and could have a material adverse effect on our operations.

Research and Development

Certain of the markets in which we compete, particularly the semiconductor equipment industry, are characterized by rapid technological change. Research and development activities are carried on in our various subsidiaries and division and are directed toward development of new products and equipment, as well as enhancements to existing products and equipment. Our total research and development expense was \$38.3 million in 2007, \$39.1 million in 2006 and \$29.1 million in 2005.

We work closely with our customers to make improvements to our existing products and in the development of

new products. We expect to continue to invest heavily in research and development and must manage product transitions successfully as introductions of new products could adversely impact sales of existing products.

Environmental Laws

Our business is subject to numerous federal, state, local and international environmental laws. On occasion, we have been notified by local authorities of instances of noncompliance with local and/or state environmental laws. We believe we are in compliance with applicable federal, state, local and international regulations. Compliance with federal, state and local laws which have been enacted or adopted regulating the discharge of materials into the environment or otherwise relating to the protection of the environment has not had a material effect and is not expected to have a material effect upon the capital expenditures, results of operations or our competitive position. However, future changes in regulations may require expenditures that could adversely impact earnings in future years.

Executive Officers of the Registrant

The following sets forth the names, ages, positions and offices held by all executive officers of Cohu as of February 12, 2008. Executive Officers serve at the discretion of the Board of Directors, until their successors are appointed.

<u>Name</u>	<u>Age</u>	<u>Position</u>
Cohu:		
James A. Donahue	59	President & Chief Executive Officer
Jeffrey D. Jones	46	Vice President, Finance & Chief Financial Officer
Delta Design:		
James G. McFarlane	57	Senior Vice President
Colin P. Scholefield	44	Senior Vice President, Sales and Service
James P. Walsh	38	Vice President, Manufacturing

Mr. Donahue has been employed by Delta Design since 1978 and has been President of Delta Design since May, 1983. In October, 1999, Mr. Donahue was named to the position of President and Chief Operating Officer of Cohu and was appointed to Cohu's Board of Directors. In June, 2000, Mr. Donahue was promoted to Chief Executive Officer.

Mr. Jones has been employed by Delta Design since 2005 as Vice President Finance and Controller. In November, 2007, Mr. Jones was named to the position of Vice President, Finance & Chief Financial Officer of Cohu. Prior to joining Delta Design, Mr. Jones, was a consultant from 2004 to June, 2005 and Vice President and General Manager of the Systems Group at SBS Technologies, Inc., a designer and manufacturer of embedded computer products, from 1998 to 2003.

Mr. McFarlane has been employed by Delta Design since 1989. He was Director of Engineering from 1992 to 1998 and was promoted to Vice President of Engineering in 1998. In 2000, Mr. McFarlane was promoted to Senior Vice President.

Mr. Scholefield has been employed by Delta Design since 1991 and has held various positions including Customer Support Manager and Director of Sales. He was promoted to Vice President of Sales in 2000, Senior Vice President of Sales in 2001 and Senior Vice President of Sales and Service in 2003.

Mr. Walsh has been employed by Delta Design since 2004 as Vice President, Product Operations. In October, 2007, Mr. Walsh was promoted to Vice President, Manufacturing. Prior to joining Delta Design, Mr. Walsh was a consultant from 2003 to June, 2004, and held various positions at Asymtek (a subsidiary of Nordson Corporation) a maker of automated dispensing equipment for the semiconductor industry from 1994 to 2003.

Employees

At December 29, 2007, we had approximately 1,000 employees. Our employee headcount has fluctuated in the last five years primarily due to the volatile business conditions in the semiconductor equipment industry. None of our employees are covered by collective bargaining agreements. We believe that a great part of our future success will depend on our continued ability to attract and retain qualified employees. Competition for the services of

certain personnel, particularly those with technical skills, is intense. There can be no assurance that we will be able to attract, hire, assimilate and retain a sufficient number of qualified employees.

Available Information

Our web site address is www.cohu.com. We make available free of charge, on or through our web site, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports, as soon as reasonably practicable after such material is electronically filed with the Securities and Exchange Commission. Our Code of Business Conduct and Ethics and other documents related to our corporate governance is also posted on our web site at www.cohu.com/investors/corporategovernance. Information contained on our web site is not deemed part of this report.

Item 1A. Risk Factors.

Before deciding to purchase, hold or sell our common stock, you should carefully consider the risks described below in addition to the other cautionary statements and risks described elsewhere, and the other information contained, in this Annual Report on Form 10-K. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also affect our business. If any of these known or unknown risks or uncertainties actually occurs with material adverse effects on Cohu, our business, financial condition and results of operations could be seriously harmed.

The semiconductor industry we serve is highly volatile and unpredictable.

Visibility into our markets is limited. Our operating results are substantially dependent on our semiconductor equipment business. This capital equipment business is in turn highly dependent on the overall strength of the semiconductor industry. Historically, the semiconductor industry has been highly cyclical with recurring periods of oversupply and excess capacity, which often have had a significant effect on the semiconductor industry's demand for capital equipment, including equipment of the type we manufacture and market. We anticipate that the markets for newer generations of semiconductors and semiconductor equipment may also be subject to similar cycles and severe downturns. Any significant reductions in capital equipment investment by semiconductor manufacturers and semiconductor test subcontractors will materially and adversely affect our business, financial position and results of operations. In addition, the volatile and unpredictable nature of semiconductor equipment demand has in the past and may in the future expose us to significant excess and obsolete and lower of cost or market inventory write-offs and reserve requirements. In 2007, 2006, and 2005, we recorded pre-tax inventory-related charges of approximately \$4.6 million, \$10.0 million, and \$6.1 million, respectively, primarily as a result of changes in customer forecasts.

A limited number of customers account for a substantial percentage of our net sales.

A small number of customers historically have been responsible for a significant portion of our net sales. In the year ended December 29, 2007, three customers of the semiconductor equipment segment accounted for 63% (63% in 2006, and 67% in 2005) of our net sales. During the past five years, the percentage of our sales derived from each of these and other significant customers has varied greatly. Such variations are due to changes in the customers' business and their purchase of products from our competitors. It is common in the semiconductor test handler industry for customers to purchase equipment from more than one equipment supplier, increasing the risk that our competitive position with a specific customer may deteriorate. No assurance can be given that we will continue to maintain our competitive position with these or other significant customers. Furthermore, we expect the percentage of our revenues derived from significant customers will vary greatly in future periods. The loss of, or a significant reduction in, orders by these or other significant customers as a result of competitive products, market conditions, outsourcing final semiconductor test to test subcontractors that are not our customers or other factors, would have a material adverse impact on our business, financial condition and results of operations. Furthermore, the concentration of our revenues in a limited number of large customers is likely to cause significant fluctuations in our future annual and quarterly operating results.

The semiconductor equipment industry in general and the test handler market in particular, is highly competitive.

The semiconductor test handler industry is intensely competitive and we face substantial competition from numerous companies throughout the world. The test handler industry, while relatively small in terms of

worldwide market size compared to other segments of the semiconductor equipment industry, has an inordinately large number of participants resulting in intense competitive pricing pressures. Future competition may include companies that do not currently supply test handlers. The Japanese and Korean markets for test handling equipment are large and represent a significant percentage of the worldwide market. During the last five years we have had only limited sales to Japanese and Korean customers who have historically purchased test handling equipment from Asian suppliers. Some of our competitors have substantially greater financial, engineering, manufacturing and customer support capabilities and offer more extensive product offerings than Cohu. In addition, there are emerging semiconductor equipment companies that provide or may provide innovative technology incorporated in products that may compete successfully against our products. We expect our competitors to continue to improve the design and performance of their current products and introduce new products with improved performance capabilities. Our failure to introduce new products in a timely manner, the introduction by our competitors of products with perceived or actual advantages, or disputes over rights to use certain intellectual property or technology could result in a loss of our competitive position and reduced sales of, or margins on our existing products. We believe that competitive conditions in the semiconductor test handler market have intensified over the last several years. This intense competition has adversely impacted our product average selling prices and gross margins on certain products. If we are unable to reduce the cost of our existing products and successfully introduce new lower cost products we expect these competitive conditions to negatively impact our gross margin and operating results in the foreseeable future.

Semiconductor equipment is subject to rapid technological change, product introductions and transitions may result in inventory write-offs and our new product development involves numerous risks and uncertainties.

Semiconductor equipment and processes are subject to rapid technological change. We believe that our future success will depend in part on our ability to enhance existing products and develop new products with improved performance capabilities. We expect to continue to invest heavily in research and development and must manage product transitions successfully, as introductions of new products, including the products obtained in our asset acquisitions with KryoTech and Unigen, may adversely impact sales and/or margins of existing products. In addition, the introduction of new products by us or by our competitors, the concentration of our revenues in a limited number of large customers, the migration to new semiconductor testing methodologies and the custom nature of our inventory parts increases the risk that our established products and related inventory may become obsolete, resulting in significant excess and obsolete inventory exposure. This increased exposure resulted in significant charges to operations during each of the years in the three-year period ended December 29, 2007. Future inventory write-offs and increased inventory reserve requirements could have a material adverse impact on our results of operations and financial condition.

The design, development, commercial introduction and manufacture of new semiconductor equipment is an inherently complex process that involves a number of risks and uncertainties. These risks include potential problems in meeting customer acceptance and performance requirements, integration of the equipment with other suppliers' equipment and the customers' manufacturing processes, transitioning from product development to volume manufacturing and the ability of the equipment to satisfy the semiconductor industry's constantly evolving needs and achieve commercial acceptance at prices that produce satisfactory profit margins. The design and development of new semiconductor equipment is heavily influenced by changes in integrated circuit assembly, test and final manufacturing processes and integrated circuit package design changes. We believe that the rate of change in such processes and integrated circuit packages is accelerating. As a result of these changes and other factors, assessing the market potential and commercial viability of handling and burn-in test equipment is extremely difficult and subject to a great deal of risk. In addition, not all integrated circuit manufacturers employ the same manufacturing processes. Differences in such processes make it difficult to design standard test products that are capable of achieving broad market acceptance. As a result, we might not accurately assess the semiconductor industry's future equipment requirements and fail to design and develop products that meet such requirements and achieve market acceptance. Failure to accurately assess customer requirements and market trends for new semiconductor test products may have a material adverse impact on our operations, financial condition and results of operations.

The transition from product development to the manufacture of new semiconductor equipment is a difficult process and delays in product introductions and problems in manufacturing such equipment are common. We

have in the past and may in the future experience difficulties in manufacturing and volume production of our new equipment. In addition, as is common with semiconductor equipment, our after sale support and warranty costs have typically been significantly higher with new products than with our established products. Future technologies, processes and product developments may render our current or future product offerings obsolete and we might not be able to develop, introduce and successfully manufacture new products or make enhancements to our existing products in a timely manner to satisfy customer requirements or achieve market acceptance. Furthermore, we might not realize acceptable profit margins on such products.

If we cannot continue to develop, manufacture and market products and services that meet customer requirements for innovation and quality, our revenue and gross margin may suffer.

The process of developing new high technology products and services and enhancing existing products and services is complex, costly and uncertain, and any failure by us to anticipate customers' changing needs and emerging technological trends accurately could significantly harm our market share and results of operations. In addition, in the course of conducting our business, we must adequately address quality issues associated with our products and services, including defects in our engineering, design and manufacturing processes, as well as defects in third-party components included in our products. In order to address quality issues, we work extensively with our customers and suppliers and engage in product testing to determine the cause of quality problems and to determine appropriate solutions. Finding solutions to quality issues can be expensive and may result in additional warranty, replacement and other costs, adversely affecting our profits. In addition, quality issues can impair our relationships with new or existing customers and adversely affect our reputation, which could lead to a material adverse effect on our operating results.

We are exposed to risks associated with acquisitions and investments.

We have made, and may in the future make, acquisitions of, or significant investments in, businesses with complementary products, services and/or technologies. Acquisitions and investments involve numerous risks, including, but not limited to:

- difficulties and increased costs in connection with integration of the personnel, operations, technologies and products of acquired businesses;
- diversion of management's attention from other operational matters;
- the potential loss of key employees of acquired businesses;
- lack of synergy, or the inability to realize expected synergies, resulting from the acquisition;
- failure to commercialize purchased technology; and
- the impairment of acquired intangible assets and goodwill that could result in significant charges to operating results in future periods.

Additionally, such acquisitions or investments may result in immediate charges to operating results. Mergers, acquisitions and investments are inherently risky and the inability to effectively manage these risks could materially and adversely affect our business, financial condition and results of operations.

We have taken remedial measures to address previous slowdowns in the semiconductor equipment industry that may affect our ability to be competitive.

In the past, we have taken remedial measures to address the slowdown in the market for our products. In particular, we reduced our workforce, delayed salary increases, reduced senior executives' pay, implemented furloughs, reduced expense budgets and announced facility consolidations. Each of these measures could have long-term effects on our business by reducing our pool of technical talent, decreasing or slowing improvements in our products and making it more difficult for us to respond to our customer's needs.

Our backlog is limited and may not accurately reflect future business activity.

Our order backlog has historically represented approximately three months of business, however, at times it has been significantly in excess of revenue recognized in the following quarter. Due to the possibility of customer changes in delivery schedules, cancellation of orders, potential delays in product shipments, difficulties in obtaining inventory parts from suppliers, failure to satisfy customer acceptance requirements and the inability to recognize revenue under accounting requirements, our backlog at any point in time may not be representative of sales in any future period. Furthermore, many orders are subject to cancellation or rescheduling by the customer with limited or no penalty. A reduction in backlog during any particular period could have a material adverse

effect on our business, financial condition and results of operations. In addition, our backlog at December 29, 2007, may not be a reliable indicator of revenues in future periods due to delayed delivery dates or customer requested changes to delivery schedules, order cancellations and delays in recognizing revenue due to accounting requirements.

The cyclical nature of the semiconductor equipment industry places enormous demands on our employees, operations and infrastructure.

The semiconductor equipment industry is characterized by dramatic and sometimes volatile changes in demand for its products. Changes in product demand result from a number of factors including the semiconductor industry's continually changing and unpredictable capacity requirements and changes in integrated circuit design and packaging. Sudden changes in demand for semiconductor equipment have a significant impact on our operations. Typically, we reduce and increase our workforce, particularly in manufacturing, based on customer demand for our products. These changes in workforce levels place enormous demands on our employees, operations and infrastructure since newly hired personnel rarely possess the expertise and level of experience of current employees. Additionally, these transitions divert management time and attention from other activities and adversely impact employee morale. We have in the past and may in the future experience difficulties, particularly in manufacturing, in training and recruiting the large number of additions to our workforce. The volatility in headcount and business levels, combined with the cyclical nature of the semiconductor industry, may require that we invest substantial amounts in new operational and financial systems, procedures and controls. We may not be able to successfully adjust our systems, facilities and production capacity to meet our customers' changing requirements. The inability to meet such requirements will have an adverse impact on our business, financial position and results of operations.

We do not participate in the gravity-feed and DRAM test handler markets.

Pick-and-place handlers used in DRAM applications account for a significant portion of the worldwide test handler market. In addition, gravity-feed test handlers are used in numerous non-DRAM applications and continue to represent a significant portion of the worldwide test handler market. We do not participate in the DRAM and/or gravity-feed market segments; therefore our total available sales market is limited.

We are exposed to the risks of operating a global business.

We are a global corporation with offices and subsidiaries in certain foreign locations to support our sales and services to the global semiconductor industry and, as such, we face risks in doing business abroad that we do not face domestically. Certain aspects inherent in transacting business internationally could negatively impact our operating results, including:

- costs and difficulties in staffing and managing international operations;
- unexpected changes in regulatory requirements;
- difficulties in enforcing contractual and intellectual property rights;
- longer payment cycles;
- local political and economic conditions;
- potentially adverse tax consequences, including restrictions on repatriating earnings and the threat of "double taxation"; and
- fluctuations in currency exchange rates, which can affect demand and increase our costs.

Additionally, managing geographically dispersed operations presents difficult challenges associated with organizational alignment and infrastructure, communications and information technology, inventory control, customer relationship management, terrorist threats and related security matters and cultural diversities. If we are unsuccessful in managing such operations effectively, our business and results of operations will be adversely affected.

Compliance with export regulations may impact sales to foreign customers.

Certain products and services that we offer require compliance with United States export regulations. Compliance with such regulations could impact certain sales, and have a material adverse effect on our operating results. In addition, failure to comply could subject us to sanctions that could negatively impact our operating results.

Failure of critical suppliers to deliver sufficient quantities of parts in a timely and cost-effective manner could adversely impact our operations.

We use numerous vendors to supply parts, components and subassemblies for the manufacture of our products. It is not always possible to maintain multiple qualified suppliers for all of our parts, components and subassemblies. As a result, certain key parts may be available only from a single supplier or a limited number of suppliers. In addition, suppliers may cease manufacturing certain components that are difficult to replace without significant reengineering of our products. On occasion, we have experienced problems in obtaining adequate and reliable quantities of various parts and components from certain key suppliers. Our results of operations may be materially and adversely impacted if we do not receive sufficient parts to meet our requirements in a timely and cost effective manner.

We cannot provide assurance that we will continue to declare dividends at all or in any particular amounts.

We intend to continue to pay quarterly dividends subject to capital availability and periodic determinations by our Board of Directors that cash dividends are in the best interests of our stockholders. Our dividend policy may be affected by, among other items, our views on potential future capital requirements, including those related to research and development, creation and expansion of sales distribution channels, investments and acquisitions, legal risks and stock repurchases.

Third parties may violate our proprietary rights or accuse us of infringing upon their proprietary rights.

We rely on patent, copyright, trademark and trade secret laws to establish and maintain proprietary rights in our technology and products. Any of our proprietary rights may expire due to patent life, or be challenged, invalidated or circumvented. In addition, from time to time, we receive notices from third parties regarding patent or copyright claims. Any such claims, with or without merit, could be time-consuming to defend, result in costly litigation, divert management's attention and resources and cause us to incur significant expenses. In the event of a successful claim of infringement against us and our failure or inability to license the infringed technology or to substitute similar non-infringing technology, our business, financial condition and results of operations could be adversely affected.

A majority of our revenues are generated from exports to foreign countries, primarily in Asia, that are subject to economic and political instability and we compete against a number of Asian test handling equipment suppliers.

During the year ended December 29, 2007, 68.8% of our total net sales were exported to foreign countries, including 74.0% of the sales in the semiconductor equipment segment. The majority of our export sales are made to destinations in Asia. Political or economic instability, particularly in Asia, may adversely impact the demand for capital equipment, including equipment of the type we manufacture and market. In addition, we face intense competition from a number of Asian suppliers that have certain advantages over U.S. suppliers, including us. These advantages include, among other things, proximity to customers, favorable tariffs and affiliation with significantly larger organizations. In addition, changes in the amount or price of semiconductors produced in Asia could impact the profitability or capital equipment spending programs of our foreign and domestic customers.

The loss of key personnel could adversely impact our business.

Certain key personnel are critical to our business. Our future operating results depend substantially upon the continued service of our key personnel, many of whom are not bound by employment or non-competition agreements. Our future operating results also depend in significant part upon our ability to attract and retain qualified management, manufacturing, technical, engineering, marketing, sales and support personnel. Competition for qualified personnel, particularly those with technical skills, is intense, and we cannot ensure success in attracting or retaining qualified personnel. In addition, the cost of living in the San Diego, California area, where the majority of our personnel are located, is very high and we have had difficulty in recruiting prospective employees from other locations. There may be only a limited number of persons with the requisite skills and relevant industry experience to serve in these positions and it may become increasingly difficult for us to hire personnel over time. Our business, financial condition and results of operations could be materially adversely affected by the loss of any of our key employees, by the failure of any key employee to perform in his or her current position, or by our inability to attract and retain skilled employees.

Our non-semiconductor equipment businesses have generated losses.

We develop, manufacture and sell products used in closed circuit television and microwave communications applications. These products are sold in highly competitive markets and many competitors are segments of large, diversified companies with substantially greater financial, engineering, marketing, manufacturing and customer support capabilities than Cohu. In addition, there are smaller companies that provide or may provide innovative technology in products that may compete favorably against our own products. We have seen a significant decline in the operating results of our television camera business over the last several years with increasing losses and the future prospects of this business remain uncertain. We may not be able to continue to compete successfully in these businesses.

New accounting and tax rules will impact our future operating results.

A change in accounting standards or a change in existing taxation rules can have a significant effect on our reported results. New accounting pronouncements and taxation rules and varying interpretations of accounting pronouncements have occurred and may occur in the future. These new accounting pronouncements and taxation rules may adversely affect our reported financial results or the way we conduct our business.

Our financial and operating results may vary and may fall below analysts' estimates, which may cause the price of our common stock to decline.

Our operating results may fluctuate from quarter to quarter due to a variety of factors including, but not limited to:

- timing and amount of orders from customers and shipments to customers;
- inability to recognize revenue due to accounting requirements;
- inventory writedowns; and
- inability to deliver solutions as expected by our customers.

Due to these factors or other unanticipated events, quarter-to-quarter comparisons of our operating results may not be reliable indicators of our future performance. In addition, from time to time our quarterly financial results may fall below the expectations of the securities and industry analysts who publish reports on our company or of investors in general. This could cause the market price of our stock to decline, perhaps significantly.

We have experienced significant volatility in our stock price.

A variety of factors may cause the price of our stock to be volatile. In recent years, the stock market in general, and the market for shares of high-technology companies in particular, including ours, have experienced extreme price fluctuations, which have often been unrelated to the operating performance of affected companies. During the last three years the price of our common stock has ranged from \$14.11 to \$29.48. The price of our stock may be more volatile than the stock of other companies due to, among other factors, the unpredictable and cyclical nature of the semiconductor industry, our significant customer concentration, intense competition in the test handler industry, our limited backlog making earnings predictability difficult and our relatively low daily stock trading volume. The market price of our common stock is likely to continue to fluctuate significantly in the future, including fluctuations related and unrelated to our performance.

Recently enacted and future changes in securities laws and regulations have increased our costs.

Changing laws, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, new SEC regulations and NASDAQ Stock Market rules, are creating challenges for publicly-held companies. We are committed to maintaining high standards of corporate governance and public disclosure. As a result, our efforts to comply with evolving laws, regulations and standards have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. In particular, our efforts to maintain compliance with Section 404 of the Sarbanes-Oxley Act of 2002 and the related regulations regarding our required assessment of our internal controls over financial reporting and our external auditors' audit of that assessment has required the commitment of significant financial and managerial resources. We expect these efforts to require the continued commitment of significant resources. Further, our board members, chief executive officer and chief financial officer could face an increased risk of personal liability in connection with the performance of their duties. As a result, we may have difficulty attracting and retaining qualified board members and executive officers, which could harm our business.

The occurrence of natural disasters in Asia and geopolitical instability caused by terrorist attacks and threats may adversely impact our operations and sales.

Our Asian sales and service headquarters is located in Singapore and the majority of our sales are made to destinations in Asia. In addition, we have an operation in the Philippines that fabricates certain component parts used in our products. These regions are known for being vulnerable to natural disasters and other risks, such as earthquakes, tsunamis, fires, floods and Avian (bird) flu, which at times have disrupted the local economies. A significant earthquake or tsunami could materially affect our operating results. We are not insured for most losses and business interruptions of this kind, and do not presently have redundant, multiple site capacity in the event of a natural disaster. In the event of such disaster, our business would suffer.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Certain information concerning our principal properties at December 29, 2007, identified by business segment is set forth below:

<u>Location</u>	<u>Approximate Sq. Footage</u>	<u>Ownership</u>
Poway, California (1) (3) (4)	338,000	Owned
Chandler, Arizona (1)	10,000	Owned
Tyngsborough, Massachusetts (1)	6,000	Leased
Singapore (1)	13,000	Leased
Calamba City, Laguna, Philippines (1)	27,000	Leased
San Diego, California (2)	57,000	Leased
Heidenrod – Kemel, Germany (3)	5,000	Leased

- (1) Semiconductor equipment
- (2) Television cameras
- (3) Microwave Communications
- (4) Cohu Corporate offices

In addition to the locations listed above, we lease other properties primarily for sales and service offices in various locations including Austin, Texas and Taipei, Taiwan. We believe our facilities are suitable for their respective uses and are adequate for our present needs.

Item 3. Legal Proceedings.

We previously disclosed in our Form 10-Q for the quarter ended June 30, 2007 that in May, 2007 our Broadcast Microwave Services subsidiary received a subpoena from a grand jury seated in the Southern District of California, requesting the production of certain documents related to BMS' export of microwave communications equipment. BMS completed production of documents responsive to the request in September 2007 and has fully cooperated. BMS has not been informed that it is a target of an investigation. As of the date of this report, it is premature to assess whether this matter will have any impact on the BMS business or results of operations.

In addition to the above matter, from time-to-time we are involved in various legal proceedings, examinations by various tax authorities and claims that have arisen in the ordinary course of our businesses. Although the outcome of such legal proceedings, claims and examinations cannot be predicted with certainty, we do not believe any such matters exist at this time that will have a material adverse effect on our financial position or results of our operations.

Item 4. Submission of Matters to a Vote of Security Holders.

None.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

(a) Market Information

Cohu, Inc. stock is traded on the NASDAQ Global Select Market under the symbol "COHU".

The following table sets forth the high and low sales prices as reported on the NASDAQ Global Select Market during the last two years.

	2007		2006	
	High	Low	High	Low
First Quarter	\$ 20.90	\$ 18.11	\$ 29.48	\$ 19.60
Second Quarter	\$ 23.01	\$ 18.51	\$ 21.35	\$ 15.75
Third Quarter	\$ 23.70	\$ 17.79	\$ 18.84	\$ 14.16
Fourth Quarter	\$ 20.75	\$ 14.11	\$ 21.95	\$ 17.34

Holdings

At January 25, 2008, Cohu had 747 stockholders of record.

Dividends

We have paid consecutive quarterly dividends since 1977 and expect to continue doing so. The declaration and payment of future dividends are subject to the discretion of our Board of Directors and availability of cash resources. Cash dividends, per share, declared in 2006 and 2007 were as follows:

Fiscal 2006

First quarter	\$0.06
Second quarter	0.06
Third quarter	0.06
Fourth quarter	<u>0.06</u>
Total	<u>\$0.24</u>

Fiscal 2007

First quarter	\$0.06
Second quarter	0.06
Third quarter	0.06
Fourth quarter	<u>0.06</u>
Total	<u>\$0.24</u>

Equity Compensation Plan Information

The following table summarizes information with respect to equity awards under Cohu's equity compensation plans at December 29, 2007:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a) (1)	Weighted average exercise price of outstanding options, warrants and rights (b) (2)	Number of securities available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
<i>(In thousands, except per share amounts)</i>			
Equity compensation plans approved by security holders	2,729	\$ 15.97	1,621 (3)
Equity compensation plans not approved by security holders	-	-	-
	2,729	\$ 15.97	1,621

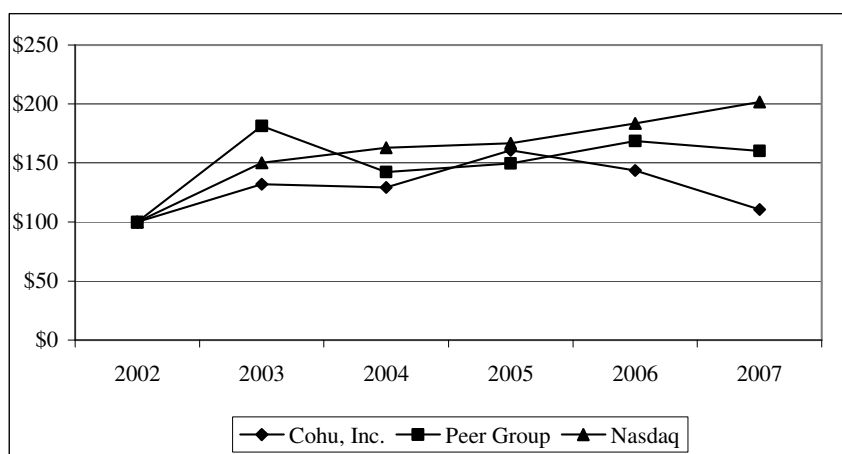

- (1) Includes options and restricted stock units (RSUs) outstanding under Cohu's equity incentive plans, as no stock warrants or other rights were outstanding as of December 29, 2007.
- (2) The weighted average exercise price of outstanding options, warrants and rights does not take RSUs into account as RSUs have a de minimus purchase price.
- (3) Includes 602,019 shares of common stock reserved for future issuance under the Cohu 1997 Employee Stock Purchase Plan.

For further details regarding Cohu's equity compensation plans, see Note 5 of Notes to Consolidated Financial Statements included in Part IV.

Comparative Stock Performance Graph

The information contained in this Stock Performance Graph section shall not be deemed to be "soliciting material" or "filed" with the SEC or subject to the liabilities of Section 18 of the Exchange Act except to the extent that Cohu specifically incorporates it by reference into a document filed under the Securities Act or the Exchange Act.

The graph below compares the cumulative total stockholder return on the common stock of Cohu for the last five fiscal years with the cumulative total return on a Peer Group Index and a NASDAQ Market Index over the same period (assuming the investment of \$100 in Cohu's common stock, Peer Group Index and NASDAQ Market Index on December 31, 2002 and reinvestment of all dividends). The Peer Group Index set forth on the Performance Graph is the index for Hemscott, Inc., Industry Group 834 "Semiconductor Equipment/Material". Industry Group 834 is comprised of approximately 35 publicly-held semiconductor equipment and other related companies. Historical stock price performance is not necessarily indicative of future stock price performance.

	2002	2003	2004	2005	2006	2007
Cohu, Inc.	\$100	\$132	\$129	\$161	\$144	\$111
Peer Group	\$100	\$181	\$142	\$150	\$169	\$160
Nasdaq	\$100	\$150	\$163	\$167	\$184	\$202

Item 6. Selected Financial Data.

The following selected financial data should be read in conjunction with Cohu's Consolidated Financial Statements and Notes thereto included in Item 15 and with Management's Discussion and Analysis of Financial Condition and Results of Operations, included in Item 7. As a result of the divestiture of FRL, we are reporting FRL as a discontinued operation for all periods presented. See Note 2 of the Notes to Consolidated Financial Statements for further discussion of the sale of FRL. In March, 2007, we purchased Tandberg Television AVS GmbH ("AVS"). The results of AVS' operations have been included in our consolidated financial statements since that date. In March, 2006, we purchased certain intellectual property, fixed assets, inventory and a customer contract of Unisys' Unigen operation. The results of Unigen's operations have been included in our consolidated financial statements since that date.

Years Ended,	Dec. 29	Dec. 30	Dec. 31	Dec. 31	Dec. 31
(in thousands, except per share data)	2007	2006	2005	2004	2003
Consolidated Statement of Operations Data:					
Net sales	\$ 241,389	\$ 270,106	\$ 231,382	\$ 169,913	\$ 133,004
Income from continuing operations (1)	\$ 8,021	\$ 18,626	\$ 34,255	\$ 17,238	\$ 639
Net income (loss) (1)	\$ 7,978	\$ 17,681	\$ 33,974	\$ 16,703	\$ (47)
Income from continuing operations per common share - basic	\$ 0.35	\$ 0.82	\$ 1.56	\$ 0.80	\$ 0.03
Income from continuing operations per common share - diluted	\$ 0.34	\$ 0.81	\$ 1.51	\$ 0.78	\$ 0.03
Net income (loss) per common share - basic	\$ 0.35	\$ 0.78	\$ 1.55	\$ 0.78	\$ (0.00)
Net income (loss) per common share - diluted	\$ 0.34	\$ 0.77	\$ 1.50	\$ 0.76	\$ (0.00)
Cash dividends per share, paid quarterly	\$ 0.24	\$ 0.24	\$ 0.22	\$ 0.20	\$ 0.20
Consolidated Balance Sheet Data:					
Total consolidated assets	\$ 340,379	\$ 326,339	\$ 306,977	\$ 250,768	\$ 224,906
Working Capital	\$ 234,345	\$ 225,520	\$ 206,295	\$ 174,493	\$ 148,897

(1) On January 1, 2006, we adopted the provisions of FASB Statement No. 123R which requires the measurement and recognition of all share-based compensation under the fair value method. Total share-based compensation recorded in the years ended December 29, 2007 and December 30, 2006 under FASB Statement No. 123R was approximately \$4.1 million and \$3.6 million, respectively. No share-based compensation expense was recorded in the years ended December 31, 2003 - 2005.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW

Our primary business activity involves the development, manufacture, marketing, sale and servicing of test handling and burn-in related equipment and thermal sub-systems for the global semiconductor industry. This business is significantly dependent on capital expenditures by semiconductor manufacturers and test subcontractors, which in turn are dependent on the current and anticipated market demand for semiconductors that are subject to significant cyclical trends in demand. We expect that the semiconductor equipment industry will continue to be cyclical and volatile as consumer electronics, rather than personal computers, are now the principal end market for integrated circuits. Demand for consumer electronic products is unpredictable and product life cycles are becoming shorter. Integrated circuit manufacturers are unwilling to absorb the carrying costs of excess capacity, and as a result, delay placing large orders with equipment suppliers until business conditions improve. Changes in the semiconductor, electronics, computer and telecommunications industries, as well as rapidly shifting global economic conditions, have had and will continue to have a significant impact on our primary business.

After several years of order growth, orders for our test handling and burn-in related equipment began to decline in the second half of 2006 and this softness carried into 2007. Conditions in the semiconductor equipment industry were generally weak in 2007 and, although we have seen some improvement in forecasts from certain customers, we do not expect any significant improvement in business conditions over the near term.

As a result of the volatility within the industry the composition of orders and revenues of our primary business changed dramatically in 2007 as semiconductor test handler and burn-in equipment orders declined significantly and orders for thermal sub-systems increased. This shift in product mix and other factors described herein led to a decline in our gross margin during 2007. To address this decline we will continue to focus on reducing product costs and overall spending, while we develop new product offerings for the test handler and burn-in markets.

Our deferred revenue totaled \$9.2 million and \$22.0 million at December 29, 2007 and December 30, 2006, respectively. The decrease in deferred revenue is the result of the recognition of revenue for certain semiconductor equipment product sales, including thermal sub-systems used in burn-in for which customer acceptance was obtained during 2007. The deferred revenue amounts recognized were partially offset by additional deferrals of semiconductor equipment product sales.

Our operating results in the last three years have been impacted by charges to cost of sales related to excess, obsolete and lower of cost or market inventory issues. These charges totaled approximately \$20.7 million during the three-year period ended December 29, 2007 (approximately \$4.6 million in 2007) and were primarily the result of decreases in customer forecasts, competitive conditions in the test handler industry and, to a lesser extent, changes in our sales product mix. Exposure related to inventories is common in the semiconductor equipment industry due to the narrow customer base, the custom nature of the products and inventory and the shortened product life cycles caused by rapid changes in semiconductor manufacturing technology. Increased competition, particularly in the last several years, has also negatively impacted our gross margins on certain products and we believe it is likely these conditions will exist for the foreseeable future.

Our other operating costs consist of research and development ("R&D") and selling, general and administrative expenses ("SG&A"). The decrease in SG&A expense in 2007 was primarily a result of lower costs in our semiconductor equipment business resulting from lower business volumes partially offset by additional costs incurred by our microwave communications business resulting from the March 2007 acquisition of AVS, and increased legal costs.

Our non-semiconductor equipment businesses have comprised approximately 15% of our consolidated revenues during the last three years. During 2007, our television camera and microwave communications businesses underperformed and generated losses from operations of \$1.7 million and \$1.8 million respectively. During 2007 we implemented strategies which we believe will help improve the profitability of these businesses. These initiatives include the introduction of new product and a strategic acquisition.

Our financial condition is strong with significant cash and short-term investments and no long-term debt. During the three-year period ended December 29, 2007, total cash and investments increased from \$116.5 million at December 31, 2004 to \$170.1 million at December 29, 2007.

Our management team uses several performance metrics to manage our various businesses. These metrics, which tend to focus on near-term forecasts due to the limited order backlog in our businesses, include (i) order bookings and backlog for the most recently completed quarter and the forecast for the next quarter; (ii) inventory levels and related excess exposures typically based on the next twelve month's forecast; (iii) gross margin and other operating expense trends; (iv) industry data and trends noted in various publicly available sources; and (v) competitive factors and information. Due to the short-term nature of our order backlog that historically has represented about three months of business and the inherent volatility of the semiconductor equipment business, our past performance is frequently not indicative of future operating results or cash flows.

Application of Critical Accounting Estimates and Policies

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience, forecasts and on various other assumptions that are believed to be reasonable under the circumstances, however actual results may differ from those estimates under different assumptions or conditions. The methods, estimates and judgments we use in applying our accounting policies have a significant impact on the results we report in our financial statements. Some of our accounting policies require us to make difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Our most critical accounting estimates, that are more fully described in our Consolidated Financial Statements included in Item 15 of this Annual Report on Form 10-K for the fiscal year ended December 29, 2007, that we believe are the most important to an investor's understanding of our financial results and condition and require complex management judgment include:

- revenue recognition, including the deferral of revenue on sales to customers, which impacts our results from operations;
- estimation of valuation allowances and accrued liabilities, specifically product warranty, inventory reserves and allowance for doubtful accounts, which impact gross margin or operating expenses;
- the recognition and measurement of current and deferred income tax assets and liabilities and unrecognized tax benefits, which impact our tax provision;
- the assessment of recoverability of long-lived assets, which primarily impacts gross margin or operating expenses if we are required to record impairments of assets or accelerate their depreciation; and
- the valuation and recognition of share-based compensation, which impacts gross margin, research and development expense, and selling, general and administrative expense.

We also have other policies that we consider key accounting policies; however, these policies typically do not require us to make estimates or judgments that are difficult or subjective.

Share-based Compensation: On January 1, 2006, we adopted the provisions of FASB Statement No. 123 (revised 2004), *Share-based Payment*, ("Statement No. 123R") and SEC Staff Accounting Bulletin No. 107, ("SAB No. 107") requiring the measurement and recognition of all share-based compensation under the fair value method. During fiscal 2006, we began recognizing share-based compensation, under Statement No. 123R, for all awards granted in fiscal 2006 and for the unvested portion of previous award grants based on each award's grant date fair value. We implemented Statement No. 123R using the modified prospective transition method. Under this transition method our financial statements and related information presented pertaining to periods prior to our adoption of Statement No. 123R, have not been adjusted to reflect the fair value of share-based compensation expense.

We estimate the fair value of each share-based award on the grant date using the Black-Scholes valuation model. To facilitate our adoption of Statement No. 123R, we applied the provisions of SAB No. 107 in developing our

methodologies to estimate our Black-Scholes model inputs for certain options granted in 2006. Option valuation models, including Black-Scholes, require the input of highly subjective assumptions, and changes in the assumptions used can materially affect the grant date fair value of an award. These assumptions include the risk-free rate of interest, expected dividend yield, expected volatility, and the expected life of the award. The risk-free rate of interest is based on the U.S. Treasury rates appropriate for the expected term of the award. Expected dividends are based primarily on historical factors related to our common stock. Expected volatility is based on historic, weekly stock price observations of our common stock during the period immediately preceding the share-based award grant that is equal in length to the award's expected term. We believe that historical volatility is the best estimate of future volatility. Due to a limited amount of historical option exercise data related to options with a five-year contractual term, we adopted SAB No. 107's simplified method for estimating the expected term of share-based awards granted during the first six months of fiscal 2006. During the third quarter of fiscal 2006 we granted options with a ten-year contractual term and utilized historical option exercise data for estimating the expected life of those awards. Statement No. 123R also requires that estimated forfeitures be included as a part of the grant date estimate. We used historical data to estimate expected employee behaviors related to option exercises and forfeitures. Prior to our adoption of Statement No. 123R, we reduced pro-forma share-based compensation expense, presented in the notes to our financial statements, for actual forfeitures as they occurred.

At December 29, 2007, excluding a reduction for forfeitures, we had approximately \$3.7 million and \$5.7 million of pre-tax unrecognized compensation cost related to unvested stock options and unvested restricted stock units which is expected to be recognized over a weighted-average period of approximately 2.3 years and 3.3 years, respectively.

Revenue Recognition: We generally recognize revenue upon shipment and title passage for established products (i.e., those that have previously satisfied customer acceptance requirements) that provide for full payment tied to shipment. Revenue for products that have not previously satisfied customer acceptance requirements or from sales where customer payment dates are not determinable is recognized upon customer acceptance. For arrangements containing multiple elements, the revenue relating to the undelivered elements is deferred at estimated fair value until delivery of the deferred elements.

Accounts Receivable: We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. If the financial condition of our customers deteriorates, resulting in an impairment of their ability to make payments, additional allowances may be required.

Warranty: We provide for the estimated costs of product warranties in the period sales are recognized. Our warranty obligation estimates are affected by historical product shipment levels, product performance and material and labor costs incurred in correcting product performance problems. Should product performance, material usage or labor repair costs differ from our estimates, revisions to the estimated warranty liability would be required.

Inventory: We record valuation reserves on our inventory for estimated excess and obsolete inventory and lower of cost or market concerns equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future product demand, market conditions and product selling prices. If future product demand, market conditions or product selling prices are less than those projected by management or if continued modifications to products are required to meet specifications or other customer requirements, increases to inventory reserves may be required.

Income Taxes: We estimate our liability for income taxes based on the various jurisdictions where we conduct business. This requires us to estimate our (i) current tax exposure; (ii) temporary differences that result from differing treatment of certain items for tax and accounting purposes and (iii) unrecognized tax benefits. Temporary differences result in deferred tax assets and liabilities that are reflected in the consolidated balance sheet. The net deferred tax assets are reduced by a valuation allowance if, based upon all available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Establishing, reducing or increasing a valuation allowance in an accounting period results in an increase or decrease in tax expense in the statement of operations. We must make significant judgments to determine the provision for income taxes, deferred tax assets and liabilities, unrecognized tax benefits and any valuation allowance to be recorded against net deferred tax assets. Our gross deferred tax asset balance as of December 29, 2007 was \$27.2 million, with a

valuation allowance of \$2.4 million for state tax credit and loss carryforwards. The deferred tax assets consist primarily of deductible temporary differences and tax credit and net operating loss carryforwards.

Intangible Assets: At December 29, 2007, intangible assets other than goodwill were evaluated for impairment using undiscounted cash flows expected to result from the use of the assets as required by FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, (“Statement No. 144”), and we concluded there was no impairment loss. We are required to assess goodwill impairment using the methodology prescribed by FASB Statement No. 142, *Goodwill and Other Intangible Assets*, (“Statement No. 142”). Statement No. 142 requires that goodwill be tested for impairment on an annual basis and more frequently in certain circumstances. The required annual goodwill impairment test is performed as of October 1st of each year. We did not recognize any goodwill impairment as a result of performing this annual test in fiscal 2007, 2006 and 2005.

Contingencies: We are subject to certain contingencies that arise in the ordinary course of our businesses. In accordance with FASB Statement No. 5, *Accounting for Contingencies*, (“Statement No. 5”) we assess the likelihood that future events will confirm the existence of a loss or an impairment of an asset. If a loss or asset impairment is probable, as defined in Statement No. 5 and the amount of the loss or impairment is reasonably estimable, we accrue a charge to operations in the period such conditions become known.

Recent Accounting Pronouncements: In December 2007, the FASB issued Statement No. 141(Revised 2007), *Business Combinations* (“Statement. No. 141R”), which establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree. This statement also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. Statement No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, and interim periods within those fiscal years. Statement No. 141R will become effective for our fiscal year beginning in 2009. We are currently evaluating the effect the adoption of Statement No. 141R could have on our consolidated financial statements, if any.

In February 2007, the FASB issued Statement No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities* (“Statement No. 159”). Statement No. 159 expands the use of fair value measurement by permitting entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. This statement is effective for us on December 30, 2007, the first day of our 2008 fiscal year. We have not yet determined if we will elect to measure any items at fair value under Statement No. 159.

In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements* (“Statement No. 157”), which defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. Statement No. 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. This statement is effective for us on December 30, 2007, the first day of our 2008 fiscal year. We are evaluating whether adoption of this statement will result in a change to our fair value measurements.

In September 2006, the SEC issued Staff Accounting Bulletin (“SAB”) No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (“SAB 108”). SAB 108 requires analysis of misstatements using both an income statement (rollover) approach and a balance sheet (iron curtain) approach in assessing materiality and provides for a one-time cumulative effect transition adjustment. SAB 108 was effective for our fiscal year 2007. The adoption of SAB 108 had no impact on our results of operations, financial position or cash flows.

In June 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109* (“FIN 48”). FIN 48 prescribes the recognition threshold and measurement criteria for determining the tax benefit amounts to recognize in the financial statements. FIN 48 requires that tax positions be assessed using a two-step process. A tax position is recognized if it meets a “more likely than not” threshold, and is measured at the largest amount of benefit that is greater than 50 percent likely of being realized. Uncertain tax positions must be reviewed at each balance sheet date. Liabilities recorded as a result of this analysis must

generally be recorded separately from deferred income tax accounts, and are classified as current or long-term based on the time until expected payment. We adopted the provisions of FIN 48 on December 31, 2006, the first day of our 2007 fiscal year. As a result of the adoption of FIN 48, we recognized a decrease in the liability for unrecognized tax benefits of approximately \$423,000, a decrease in deferred tax assets of approximately \$381,000 and a corresponding increase in the December 31, 2006 balance of retained earnings of approximately \$42,000.

In June 2006, the FASB reached a consensus on Emerging Issues Task Force (“EITF”) Issue No. 06-3, *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross versus Net Presentation)*, (“EITF 06-03”). EITF 06-3 indicates that the income statement presentation on either a gross basis or a net basis of the taxes within the scope of the issue is an accounting policy decision that should be disclosed. EITF 06-3 is effective for interim and annual periods beginning after December 15, 2006. The adoption of EITF 06-3 did not change our policy of presenting taxes within the scope of EITF 06-3 on a net basis and had no impact on our consolidated financial statements.

RESULTS OF OPERATIONS

The following table summarizes certain operating data from continuing operations as a percentage of net sales for the three-year period.

	2007	2006	2005
Net sales	100.0%	100.0%	100.0%
Cost of sales	(67.4)	(65.6)	(59.9)
Gross margin	32.6	34.4	40.1
Research and development	(15.9)	(14.5)	(12.6)
Selling, general and administrative	(15.0)	(13.7)	(14.2)
Gain on sale of facilities	-	1.1	-
Income from operations	1.7%	7.3%	13.3%

In May, 2006, we sold our metal detection equipment business, FRL. Subsequent to the sale, the operating results of FRL are being presented as discontinued operations and the consolidated financial statements for all prior periods have been reclassified accordingly. Unless otherwise indicated, the discussion and amounts provided in the “Results of Operations” section and elsewhere in this Annual Report on Form 10-K relate to continuing operations only.

2007 Compared to 2006

Net Sales

Our net sales decreased 10.6% to \$241.4 million in 2007, compared to net sales of \$270.1 million in 2006. Sales of semiconductor equipment in 2007 decreased 10.7% from the comparable 2006 period and accounted for 84.1% of consolidated net sales versus 84.2% in 2006. The primary cause of the decrease in sales of semiconductor equipment was a result of a decline in orders for our test handling and burn-in related equipment which began in the second half of 2006 and carried into 2007. Conditions in the back-end semiconductor equipment industry were generally weak in 2007. At Delta, these underlying and challenging industry dynamics were intensified by a sharp decline in orders for our highest-margin product, the Summit handler. The decline in semiconductor test handler and burn-in equipment orders was partially offset by the success of our new thermal sub-system that began shipping during 2007; however, this thermal sub-system has a much lower selling price and gross margin than our Summit test handler.

Sales of television cameras accounted for 6.8% of net sales in 2007 and decreased 10.7% when compared to the same period of 2006. The primary cause of this decrease in sales is a result of decreased demand for our traffic camera products in transportation related applications.

Sales of microwave communications equipment accounted for 9.1% of net sales in 2007 and decreased 10.1% when compared to 2006. During 2007 we saw an increase in demand for our microwave communications products primarily as a result of the acquisition of AVS in March 2007 and strong demand from government agencies, however, total sales recognized by this segment decreased in 2007 due to the recognition of approximately \$7.9 million in revenue associated with our contract with the UAE that was accepted and paid in the third quarter of 2006.

Gross Margin

Gross margin consists of net sales less cost of sales. Cost of sales consists primarily of the cost of materials, assembly and test labor, and overhead from operations. Our gross margin can fluctuate due to a number of factors, including, but not limited to, the mix of products sold; product support costs; inventory reserve adjustments; and utilization of manufacturing capacity. Our gross margin, as a percentage of net sales, decreased to 32.6% in 2007 from 34.4% in 2006. Our lower gross margin in 2007 was the result of lower margins in our semiconductor equipment business due to a change in product mix from our thermal test handlers to thermal sub-system products. Our thermal sub-system products have significantly lower gross margins than our thermal test handlers. Based on current customer forecasts, we expect this trend to continue in the future and, as a result, our gross margin could continue to be impacted. To address the decrease in gross margin we are focusing on reducing product costs and overall spending.

In addition to a shift in product mix, our gross margin has been impacted by charges to cost of sales related to excess, obsolete and lower of cost or market inventory issues and higher warranty costs associated with certain test handlers. We compute the majority of our excess and obsolete inventory reserve requirements using a one-year inventory usage forecast. During 2007 and 2006, we recorded net charges to cost of sales of approximately \$4.6 million and \$10.0 million, respectively, for excess and obsolete inventory. Approximately \$4.6 million of the charge recorded during 2006 was a result of a decline in customer forecasts for a burn-in system, acquired from Unigen, which negatively impacted our forecasted inventory usage. While we believe our reserves for excess and obsolete inventory and lower of cost or market concerns are adequate to cover our known exposures at December 29, 2007, reductions in customer forecasts or continued modifications to products, as a result of our failure to meet specifications or other customer requirements, will result in additional charges to operations that could negatively impact our gross margin in future periods. Conversely, if our actual inventory usage is greater than our forecasted usage, our gross margin in future periods may be favorably impacted.

Research and Development Expense

R&D expense consists primarily of salaries and related costs of employees engaged in ongoing research, product design and development activities, costs of engineering materials and supplies, and professional consulting expenses. R&D expense as a percentage of net sales was 15.9% in 2007, compared to 14.5% in 2006, decreasing from \$39.1 million in 2006 to \$38.3 million in 2007. Decreased R&D expense in 2007 was primarily a result of decreased labor and material costs within our semiconductor equipment and television camera businesses of approximately \$1.3 million and \$0.5 million, respectively, offset by an additional \$1.0 million of R&D related costs incurred by our microwave communications business resulting from the March 2007 acquisition of AVS, and other costs associated with new product development within that segment.

Selling, General and Administrative Expense

SG&A expense consists primarily of salaries and benefit costs of employees, commission expense for independent sales representatives, product promotion and costs of professional services. SG&A expense as a percentage of net sales was 15.0% in 2007, compared to 13.7% in 2006, decreasing from \$37.1 million in 2006 to \$36.2 million in 2007. The decrease in SG&A expense in 2007 was primarily a result of: a \$2.2 million decline in costs incurred by our semiconductor equipment business resulting from lower business volume due to the weak business conditions that existed within the back-end semiconductor equipment industry during 2007; a \$0.2 million decrease in costs incurred by our television camera business due to lower sales in 2007; and \$0.5 million in decreased administrative costs within our corporate organization. These reductions were offset by an additional \$1.9 million of SG&A related costs incurred by our microwave communications business resulting from the March 2007 acquisition of AVS, and increased legal costs.

Interest Income

Interest income was approximately \$8.4 million and \$6.7 million in 2007 and 2006, respectively. The increase in interest income resulted from an increase in our average cash and cash equivalents and investment balances and higher interest rates.

Income Taxes

The provision for income taxes expressed as a percentage of pre-tax income was 36.8% in 2007 and 29.5% in 2006. The provision for income taxes for the year ended December 29, 2007 differs from the U.S. federal

statutory rate primarily due to research and development tax credits, the effect of Statement No. 123R that does not allow deferred tax benefits to be recognized on compensation expense related to incentive stock options and employee stock purchase plans and an increase in the valuation allowance on deferred tax assets.

Realization of our deferred tax assets is based upon the weight of all available evidence, including such factors as our recent earnings history and expected future taxable income. We believe that it is more likely than not that the majority of these assets will be realized; however, ultimate realization could be negatively impacted by market conditions or other factors not currently known or anticipated. In accordance with FASB Statement No. 109, *Accounting for Income Taxes*, (“Statement No. 109”), net deferred tax assets are reduced by a valuation allowance if it is more likely than not that some or all of the deferred tax assets will not be realized. A valuation allowance of approximately \$2.4 million and \$1.6 million was provided on deferred tax assets at December 29, 2007 and December 30, 2006, respectively, for state tax credit and net operating loss carryforwards that, in the opinion of management, are more likely than not to expire before we can use them.

We have derived significant tax benefits from research and development tax credits. The federal research and development tax credit expired on December 31, 2007 and it is uncertain when or if this tax credit will be extended. If the credit is not extended, our income tax expense and effective tax rate in future periods will be adversely impacted.

In October, 2007 the IRS commenced a routine examination of our U.S. income tax return for 2005. This examination is expected to be completed in 2008. We believe it is reasonably possible that a portion of our total unrecognized tax benefits will decrease in the next 12 months upon the conclusion of the examination or the lapse of the applicable statute of limitations. However, it is premature to assess the range or the nature of the reasonably possible changes to our unrecognized tax benefits.

Other Items

In May, 2006, we sold the land and building previously used by our operations in Littleton, Massachusetts. The property was sold for \$6.5 million in cash, less related costs, resulting in a net pretax gain of approximately \$3.0 million that was recognized in 2006.

In May, 2006, we sold substantially all the assets of our metal detection equipment business, FRL. The disposition resulted in a loss of approximately \$1.4 million that was recorded in 2006. Amounts incurred in 2007 related to the disposition were not significant.

As a result of the factors set forth above, our income from continuing operations was \$8.0 million in 2007, compared to \$18.6 million in 2006. Our net income was \$8.0 million in 2007, compared to \$17.7 million in 2006.

2006 Compared to 2005

Net Sales

Our net sales increased 16.7% to \$270.1 million in 2006, compared to net sales of \$231.4 million in 2005. Sales of semiconductor equipment in 2006 increased 13.3% from the comparable 2005 period and accounted for 84.2% of consolidated net sales in 2006 versus 86.8% in 2005. The primary reasons for the increase in sales of our semiconductor equipment business were increased sales of our high-speed test handlers and a burn-in system acquired in the Unigen transaction. Semiconductor equipment was a lower percentage of consolidated sales in 2006 primarily as a result of the recognition of \$7.9 million in revenue from our contract with the UAE for microwave communications equipment.

Sales of television cameras and other equipment accounted for 6.8% of net sales in 2006 and increased 2.8% when compared to the same period in 2005. The primary reason for the increase in sales of our television camera business was increased demand for board level cameras from original equipment manufacturers and increased demand for closed circuit security cameras.

Sales of microwave equipment accounted for 9.0% of net sales in 2006 and increased 90.4% when compared to 2005. The increase in sales of our microwave communications business was primarily attributable to the recognition of approximately \$7.9 million in revenue associated with our contract with the UAE that was accepted and paid in 2006 and increased demand for our other products during 2006.

Gross margin

Our gross margin, as a percentage of net sales, decreased to 34.4% in 2006 from 40.1% in 2005. The decrease was the result of lower margins in our semiconductor equipment and microwave communications businesses. During 2006, high-speed test handlers accounted for a greater percentage of revenue than in fiscal 2005. Our high-speed test handlers have significantly lower gross margins than our advanced thermal test handlers. Additionally, during 2006 we recognized \$12.9 million in revenue for a burn-in system, acquired from Unigen, which generated a gross margin of approximately 20%. Our consolidated gross margin was also negatively impacted when our microwave communications business recognized approximately \$7.9 million in revenue associated with its contract with the UAE which generated a gross margin of approximately 20%. The remaining revenue of \$1.0 million and associated profit under this contract will be recognized upon completion of the two-year warranty period and release from our obligation under a standby letter of credit. Additionally, during 2006, we recorded approximately \$0.4 million in share-based compensation expense as a result of our adoption of Statement No. 123R.

Our gross margin has been impacted by charges to cost of sales related to excess, obsolete and lower of cost or market inventory issues and in 2006 higher warranty costs associated with certain test handlers. We compute the majority of our excess and obsolete inventory reserve requirements using a one-year inventory usage forecast. During 2006 and 2005, we recorded net charges to cost of sales of approximately \$10.0 million and \$6.1 million, respectively, for excess and obsolete inventory. Approximately \$4.6 million of the charge recorded during 2006 was the result of a decline in customer forecasts for a burn-in system, acquired from Unigen.

Research and Development Expense

R&D expense as a percentage of net sales was 14.5% in 2006, compared to 12.6% in 2005, increasing from \$29.1 million in fiscal 2005 to \$39.1 million in fiscal 2006. Higher R&D expense in 2006 was primarily a result of increased engineering headcount and overhead costs as a result of our Unigen acquisition and labor and material costs for new product development within our semiconductor equipment business. Additionally, during 2006, we recorded approximately \$1.0 million in share-based compensation expense as a result of our adoption of Statement No. 123R.

Selling, General and Administrative Expense

SG&A expense as a percentage of net sales decreased to 13.7% in 2006, from 14.2% in 2005, increasing in absolute dollars from \$32.9 million in 2005 to \$37.1 million in 2006. The increase in SG&A expense was primarily related to increased business volume, and recognition of deferred costs associated with our microwave communications contract with the UAE. Additionally, during 2006, we recorded approximately \$2.2 million in share-based compensation expense as a result of our adoption of Statement No. 123R.

Interest Income

Interest income was approximately \$6.7 million and \$3.9 million in fiscal 2006 and 2005, respectively. The increase in interest income resulted from higher interest rates and an increase in our average cash and cash equivalents and short-term investment balances in 2006.

Income Taxes

The provision for income taxes expressed as a percentage of pre-tax income was 29.5% in 2006 and 1.4% in 2005. The provision for income taxes for the year ended December 30, 2006 is less than the U.S. federal statutory rate primarily due to research and development tax credits, export sales benefits and the domestic manufacturing deduction offset by the effect of Statement No. 123R that does not allow deferred tax benefits to be recognized on compensation expense related to incentive stock options and employee stock purchase plans. The tax provision for the year ended December 31, 2005 includes a reduction in the valuation allowance on deferred tax assets of approximately \$5.1 million. Other factors that reduced our 2005 effective tax rate below the U.S. federal statutory rate included tax credits, export sales benefits and the reversal of approximately \$3.1 million in accrued income taxes related to a tax examination completed in March 2005.

As a result of the factors set forth above, our income from continuing operations was \$18.6 million in 2006, compared to \$34.3 million in 2005. Our net income was \$17.7 million in 2006, compared to \$34.0 million in 2005.

LIQUIDITY AND CAPITAL RESOURCES

Our business is dependent on capital expenditures by semiconductor manufacturers and test subcontractors that are, in turn, dependent on the current and anticipated market demand for semiconductors. Demand for semiconductors is cyclical and volatile. We have implemented cost reduction programs aimed at aligning our ongoing operating costs with our currently expected revenues over the near term. These cost management initiatives include consolidating facilities, reductions to headcount and reduced spending. The cyclical and volatile nature of our industry makes estimates of future revenues, results of operations and net cash flows difficult.

Our primary historical source of liquidity and capital resources has been cash flow generated by operations. While we maintain a credit facility, we have not used this as a source of cash and do not intend to do so. We use cash to fund growth in our operating assets, including accounts receivable and inventory, and to fund new products and product enhancements primarily through research and development.

Liquidity

Working Capital: The following summarizes our cash, cash equivalents, short-term investments and working capital:

<i>(in thousands)</i>	December 29, 2007	December 30, 2006	Increase	Percentage Change
Cash, cash equivalents and short-term investments	\$ 170,118	\$ 147,916	\$ 22,202	15.0%
Working capital	234,345	225,520	8,825	3.9%

Cash Flows

Operating Activities: Cash generated from operating activities consists of net income, adjusted for non-cash expenses and changes in operating assets and liabilities. Non-cash items include depreciation and amortization; non-cash share-based compensation expense; and deferred income taxes. Our net cash flows provided from operating activities in 2007 totaled \$33.8 million compared to \$12.5 million in 2006. The increase in cash provided by operating activities was primarily due to the change in current assets and liabilities and included a decrease in accounts receivable and inventories of \$4.8 million and \$6.8 million, respectively and an increase in accounts payable of \$8.6 million. The decrease in accounts receivable was primarily due to cash collections made during 2007 and decreased business volume within our semiconductor equipment business. The decrease in inventory was a result of decreased order backlog within our semiconductor equipment business and our ongoing efforts to reduce inventory levels. The increase in accounts payable was a result of the timing of cash payments primarily within our semiconductor equipment business.

Investing Activities: Investing cash flows consist primarily of cash used for capital expenditures in support of our businesses, proceeds from investment maturities, asset disposals and divestitures, and cash used for purchases of investments and business acquisitions. Our net cash provided from investing activities in 2007 totaled \$19.6 million and was primarily the result of \$183.0 million in net proceeds from sales and maturities of short-term investments, offset by \$152.6 million in cash used for purchases of short-term investments. We invest our excess cash, in an attempt to seek the highest available return while preserving capital, in short-term investments since excess cash is only temporarily available and may be required for a business-related purpose. Other expenditures in 2007 included the purchase of AVS for \$8.2 million and purchases of property, plant and equipment of \$2.4 million. The acquisition of AVS was a strategic transaction to expand our digital microwave communications solutions, especially in high definition broadcast television and public safety and law enforcement applications within our microwave communications equipment business. The purchases of property, plant and equipment were primarily made to support activities in our semiconductor equipment business and consisted primarily of equipment used in engineering, manufacturing and related functions.

Financing Activities: Cash flows from financing activities consist primarily of net proceeds from the issuance of common stock under our stock option and employee stock purchase plans which totaled \$3.9 million during 2007. We issue stock options and maintain an employee stock purchase plan as components of our overall employee compensation. We declared and paid dividends totaling \$5.5 million, or \$0.24 per common share, during 2007. On January 31, 2008, we announced a cash dividend of \$0.06 per share on our common stock, payable on, April 25, 2008 to stockholders of record as of March 11, 2008. We intend to continue to pay quarterly dividends

subject to capital availability and periodic determinations by our Board of Directors that cash dividends are in the best interests of our stockholders.

Capital Resources

In May, 2007, we renewed our \$5.0 million unsecured bank line of credit bearing interest at the bank's prime rate. The line of credit will expire in July, 2008, and requires that we maintain specified minimum levels of net worth, limits the amount of our capital expenditures and requires us to meet certain other financial covenants. We are currently in compliance with these covenants. No borrowings were outstanding at December 29, 2007; however, approximately \$1.3 million of the credit facility was allocated to standby letters of credit at December 29, 2007, leaving the balance of \$3.7 million available for future borrowings.

We expect that we will continue to make capital expenditures to support our business and we anticipate that present working capital and available borrowings under our line of credit will be sufficient to meet our operating requirements for at least the next twelve months.

Contractual Obligations

The following table summarizes our significant contractual obligations at December 29, 2007, and the effect such obligations are expected to have on our liquidity and cash flows in future periods. This table excludes amounts already recorded on our balance sheet as current liabilities at December 29, 2007. Amounts excluded include our liability for unrecognized tax benefits that totaled approximately \$4.8 million at December 29, 2007. We are currently unable to provide a reasonably reliable estimate of the amount or periods cash settlement of this liability may occur.

Fiscal Year	2008	2009	2010	2011	2012	Total
<i>(in thousands)</i>						
Non-cancelable operating leases	\$1,345	\$376	\$249	\$214	\$108	\$2,292

Purchase Commitments: From time to time, we enter into commitments with our vendors to purchase inventory at fixed prices or in guaranteed quantities. We are not able to determine the aggregate amount of such purchase orders that represent contractual obligations, as purchase orders may represent authorizations to purchase rather than binding agreements. Our purchase orders are based on our current manufacturing needs and are fulfilled by our vendors within relatively short time horizons. We do not have significant agreements for the purchase of raw materials or other goods specifying minimum quantities or set prices that exceed our expected requirements for the next three months.

Off-Balance Sheet Arrangements: During the ordinary course of business, we provide standby letters of credit instruments to certain parties as required. As of December 29, 2007, the maximum potential amount of future payments that we could be required to make under these standby letters of credit was approximately \$1.3 million. No liability has been recorded in connection with these arrangements beyond those required to appropriately account for the underlying transaction being guaranteed. Based on historical experience and information currently available, we do not believe it is probable that any amounts will be required to be paid under these arrangements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Interest rate risk.

At December 29, 2007, our investment portfolio included short-term, fixed-income investment securities with a fair value of approximately \$92.8 million. These securities are subject to interest rate risk and will decline in value if interest rates increase. Due to the relatively short duration of our investment portfolio, an immediate ten percent change in interest rates (e.g. 5.00% to 5.50%) would have no material impact on our financial condition or results of operations.

Foreign currency exchange risk.

Except for our subsidiary based in Germany that conducts business in Euros, we generally conduct business, including sales to foreign customers, in U.S. dollars and as a result we have limited foreign currency exchange rate risk. Monetary assets and liabilities of our foreign operations are not significant. The effect of an immediate

ten percent change in foreign exchange rates would not have a material impact on our financial condition or results of operations.

Item 8. Financial Statements and Supplementary Data.

The information required by this Item is included in Part IV Item 15(a).

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures - Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on this evaluation, our principal executive officer and our principal financial officer concluded that our disclosure controls and procedures were effective as of December 29, 2007, the end of the period covered by this annual report.

Management's Annual Report on Internal Control Over Financial Reporting - Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in *Internal Control - Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 29, 2007.

Ernst & Young LLP, the independent registered public accounting firm that audited the consolidated financial statements included in this Annual Report on Form 10-K, has also audited the effectiveness of our internal control over financial reporting as of December 29, 2007, as stated in their report which is included herein.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Cohu, Inc.

We have audited Cohu, Inc.'s internal control over financial reporting as of December 29, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO criteria"). Cohu, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Cohu, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 29, 2007, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Cohu, Inc. as of December 29, 2007 and December 30, 2006, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 29, 2007 of Cohu, Inc. and our report dated February 12, 2008 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

San Diego, California
February 12, 2008

Changes in Internal Control Over Financial Reporting - There have been no changes in our internal control over financial reporting that occurred during the fourth quarter of 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information.

None.

PART III

Item 10. Directors and Executive Officers of the Registrant.

Information regarding Directors and Executive Officers of the Registrant, is hereby incorporated by reference to the Company's definitive proxy statement, which will be filed with the Securities and Exchange Commission ("SEC") within 120 days after the close of fiscal 2007.

Item 11. Executive Compensation.

Information regarding Executive Compensation is hereby incorporated by reference to the Company's definitive proxy statement, which will be filed with the SEC within 120 days after the close of fiscal 2007.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Information regarding Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters is hereby incorporated by reference to the Company's definitive proxy statement, which will be filed with the SEC within 120 days after the close of fiscal 2007.

Item 13. Certain Relationships and Related Transactions.

Information regarding Certain Relationships and Related Transactions is hereby incorporated by reference to the Company's definitive proxy statement, which will be filed with the SEC within 120 days after the close of fiscal 2007.

Item 14. Principal Accounting Fees and Services.

Information regarding the Principal Accounting Fees and Services is hereby incorporated by reference to the Company's definitive proxy statement, which will be filed with the SEC within 120 days after the close of fiscal 2007.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a) The following documents are filed as part of, or incorporated by reference into, this Annual Report on Form 10-K.

(1) Financial Statements

The following Consolidated Financial Statements of Cohu, Inc., including the report thereon of Ernst & Young LLP, are included in this Annual Report on Form 10-K beginning on page 33:

<u>Description</u>	<u>Form 10-K Page Number</u>
Consolidated balance sheets at December 29, 2007 and December 30, 2006.....	33
Consolidated statements of income for each of the three years in the period ended December 29, 2007.....	34
Consolidated statements of stockholders' equity for each of the three years in the period ended December 29, 2007.....	35
Consolidated statements of cash flows for each of the three years in the period ended December 29, 2007.....	36
Notes to consolidated financial statements	38-58
Report of Independent Registered Public Accounting Firm	59

(2) Financial Statement Schedule

Schedule II – Valuation and Qualifying Accounts	63
---	----

All other financial statement schedules have been omitted because the required information is not applicable or not present in amounts sufficient to require submission of the schedule, or because the information required is included in the consolidated financial statements or the notes thereto.

(3) Exhibits

The exhibits listed under Item 15(b) hereof are filed with, or incorporated by reference into, this Annual Report on Form 10-K.

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Principles of Consolidation – The consolidated financial statements include the assets, liabilities and operating results of Cohu, Inc. and our wholly-owned subsidiaries (“Cohu”, “we”, “our” and “us”). All significant intercompany balances and transactions have been eliminated in consolidation.

Financial Statement Preparation – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and the disclosure of contingent amounts in our financial statements and the accompanying notes. These estimates include assessing the collectibility of accounts receivable, usage and recoverability of inventory and long-lived and deferred tax assets and incurrence of warranty costs. Actual results could differ from those estimates. Certain prior year deferred income tax balances have been reclassified for consistency with the current year presentation. These reclassifications had no effect on reported results of operations.

Fiscal Year – Our current fiscal year ended on December 29, 2007 and consisted of 52 weeks. Our fiscal years ended December 30, 2006 and December 31, 2005 also consisted of 52 weeks.

Risks and Uncertainties – We are subject to a number of risks and uncertainties that may significantly impact our future operating results. These risks and uncertainties are discussed under Item 1A. “Risk Factors” included in this Annual Report on Form 10-K. Understanding these risks and uncertainties is integral to the review of our consolidated financial statements.

Discontinued Operations – In May 2006, we sold our metal detection equipment business, FRL. Subsequent to the sale, the operating results of FRL are being presented as discontinued operations and all prior period financial statements have been reclassified accordingly.

Share-based Compensation – On January 1, 2006, we adopted the provisions of Statement No. 123R and SAB No. 107 requiring the measurement and recognition of all share-based compensation under the fair value method. During fiscal 2006, we began recognizing share-based compensation under Statement No. 123R for all awards granted during 2006 and for the unvested portion of previous award grants based on each award’s grant date fair value. We implemented Statement No. 123R using the modified prospective transition method. Under this transition method our financial statements and related information presented, pertaining to periods prior to our adoption of Statement No. 123R, have not been adjusted to reflect the fair value of share-based compensation expense.

Income (Loss) Per Share – Income (loss) per share is computed in accordance with FASB Statement No. 128, *Earnings Per Share*. Basic income (loss) per share is computed using the weighted average number of common shares outstanding during each period. Diluted income per share includes the dilutive effect of common shares potentially issuable upon the exercise of stock options and issuance of restricted stock units. For purposes of computing diluted income per share, stock options with exercise prices that exceed the average fair market value of our common stock for the period are excluded. For the years ended December 29, 2007, December 30, 2006 and December 31, 2005 options to purchase approximately 684,000, 910,000, and 387,000 shares of our common stock, respectively, were excluded from the computation.

The following table reconciles the denominators used in computing basic and diluted income (loss) per share:

<i>(in thousands)</i>	2007	2006	2005
Weighted average common shares outstanding	22,880	22,588	21,902
Effect of dilutive stock options and restricted stock units	390	346	683
	<u>23,270</u>	<u>22,934</u>	<u>22,585</u>

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Investments – Highly liquid investments with insignificant interest rate risk and original maturities of three months or less are classified as cash and cash equivalents. Cash equivalents are comprised of money market funds and corporate debt securities. The carrying amounts approximate fair value due to the short maturities of these instruments. Investments with maturities greater than three months are classified as short-term investments. All of our short-term investments are classified as available-for-sale and are reported at fair value, as determined by quoted market prices, with any unrealized gains and losses, net of tax, recorded as a separate component of accumulated other comprehensive income in stockholders' equity. We manage our cash equivalents and short-term investments as a single portfolio of highly marketable securities. We have the ability and intent, if necessary, to liquidate any of our investments in order to meet the liquidity needs of our current operations during the next 12 months. Accordingly, investments with contractual maturities greater than one year from December 29, 2007 have been classified as current assets in the accompanying consolidated balance sheets.

Concentration of Credit Risk – Financial instruments that potentially subject us to significant credit risk consist principally of cash equivalents, short-term investments and trade accounts receivable. We invest in a variety of financial instruments and, by policy, limit the amount of credit exposure with any one issuer. Our customers include semiconductor manufacturers and semiconductor test subcontractors and other customers located throughout many areas of the world. We perform ongoing credit evaluations of our customers and generally require no collateral.

Inventories – Inventories are stated at the lower of cost, determined on a current average or first-in, first-out basis, or market. Cost includes labor, material and overhead costs. Determining market value of inventories involves numerous estimates and judgments including projecting average selling prices and sales volumes for future periods and costs to complete and dispose of inventory. As a result of these analyses, we record a charge to cost of sales in advance of the period when the inventory is sold when market values are below our costs. Charges to cost of sales for excess and obsolete inventories aggregated \$4.6 million, \$10.0 million, and \$6.1 million in 2007, 2006 and 2005, respectively.

Property, Plant and Equipment – Depreciation and amortization of property, plant and equipment is calculated principally on the straight-line method based on estimated useful lives of thirty to forty years for buildings, five to fifteen years for building improvements and three to ten years for machinery, equipment and software.

On May 5, 2006, we completed the sale of the land and building previously used by our operations in Littleton, Massachusetts. The property was sold for \$6.5 million in cash, less related costs, resulting in a net pre-tax gain of approximately \$3.0 million.

Goodwill and Other Intangible Assets – Under Statement No. 142, goodwill and other intangible assets with indefinite useful lives are not amortized, but are reviewed annually for impairment or more frequently if impairment indicators arise. We perform the required annual goodwill impairment test as of October 1 of each year. Separable intangible assets that have finite lives are amortized over their useful lives. Under Statement No. 142, goodwill and other intangible assets with indefinite useful lives resulting from acquisitions are not amortized.

Revenue Recognition – In accordance with the guidance provided by SEC Staff Accounting Bulletin No. 104 ("SAB No. 104"), we recognize revenue when there is persuasive evidence of an arrangement, title and risk of loss have passed, delivery has occurred or the services have been rendered, the sales price is fixed or determinable and collection of the related receivable is reasonably assured. Title and risk of loss generally pass to our customers upon shipment. In circumstances where either title or risk of loss pass upon destination or acceptance, we defer revenue recognition until such events occur.

Revenue for established products that have previously satisfied a customer's acceptance requirements and provide for full payment tied to shipment is generally recognized upon shipment and passage of title. In

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

certain instances, customer payment terms may provide that a minority portion (e.g. 20%) of the equipment purchase price be paid only upon customer acceptance. In those situations, the majority portion (e.g. 80%) of revenue where payment is tied to shipment and the entire product cost of sale are recognized upon shipment and passage of title and the minority portion of the purchase price related to customer acceptance is deferred and recognized upon receipt of customer acceptance.

In cases where a prior history of customer acceptance cannot be demonstrated or from sales where customer payment dates are not determinable and in the case of new products, revenue is deferred until customer acceptance has been received. Our post-shipment obligations typically include installation, training services and standard warranties. The estimated fair value of installation related revenue is recognized in the period the installation is performed. Service revenue is recognized ratably over the period of the related contract. Spares and kit revenue is generally recognized upon shipment.

Certain of our equipment sales are accounted for as multiple-element arrangements. A multiple-element arrangement is a transaction which may involve the delivery or performance of multiple products, services, or rights to use assets, and performance may occur at different points in time or over different periods of time. For arrangements containing multiple elements, the revenue relating to the undelivered elements is deferred at estimated fair value until delivery of the deferred elements.

On shipments where sales are not recognized, gross profit is generally recorded as deferred profit in our consolidated balance sheet representing the difference between the receivable recorded and the inventory shipped. In certain instances where customer payments are received prior to product shipment, the customer's payments are recorded as customer advances in our consolidated balance sheet. At December 29, 2007, we had total deferred revenue of approximately \$9.2 million and deferred profit of \$4.9 million. At December 30, 2006, we had total deferred revenue of approximately \$22.0 million and deferred profit of \$9.8 million.

Product Warranty – Product warranty costs are accrued in the period sales are recognized. Our products are generally sold with standard warranty periods, which differ by product, ranging from 12- to 36-months. Parts and labor are typically covered under the terms of the warranty agreement. Our warranty expense accruals are based on historical and estimated costs by product and configuration. From time-to-time we offer customers extended warranties beyond the standard warranty period. In those situations the revenue relating to the extended warranty is deferred at its estimated fair value and recognized on a straight-line basis over the contract period. Related costs are expensed as incurred.

Income Taxes – In June 2006, the FASB issued FIN 48, “*Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*” (“FIN 48”). FIN 48 prescribes the recognition threshold and measurement criteria for determining the tax benefit amounts to recognize in the financial statements. We adopted the provisions of FIN 48 on December 31, 2006, the first day of our 2007 fiscal year (see Note 7).

We assess our income tax positions and record tax benefits for all years subject to examination based upon management's evaluation of the facts, circumstances and information available at the reporting dates. For those tax positions where it is more-likely-than-not that a tax benefit will be sustained, we have recorded the largest amount of tax benefit with a greater than 50 percent likelihood of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where it is not more-likely-than-not that a tax benefit will be sustained, no tax benefit has been recognized in the financial statements. Where applicable, associated interest has also been recognized and recorded, net of federal and state tax benefits, in income tax expense.

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Contingencies and Litigation – We assess the probability of adverse judgments in connection with current and threatened litigation. We would accrue the cost of an adverse judgment if, in our estimation, the adverse outcome is probable and we can reasonably estimate the ultimate cost.

Foreign Currency Translation – Our foreign subsidiaries, with the exception of our subsidiary located in Germany, use the U.S. dollar as their functional currency. Accordingly, assets and liabilities of these subsidiaries are translated using exchange rates in effect at the end of the period, except for nonmonetary assets, such as inventories and property, plant and equipment, which are translated using historical exchange rates. Revenues and costs are translated using average exchange rates for the period, except for costs related to those balance sheet items that are translated using historical exchange rates. Gains and losses on foreign currency transactions are recognized as incurred. Our subsidiary located in Germany, acquired in March 2007, uses the Euro as its functional currency and, as a result, its assets and liabilities are translated at the rate of exchange at the balance sheet date, while revenue and expenses are translated using the average exchange rate for the period. Cumulative translation adjustments resulting from the translation of the financial statements are included as a separate component of stockholders' equity. Foreign currency gains and losses were not significant in any period and are included in the consolidated statements of income.

Derivative Instruments and Hedging Activities – FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, requires, among other things, that all derivatives be recognized in the balance sheet at fair value and special accounting for hedging activities that meet certain criteria. We generally do not hold derivative instruments or engage in hedging activities.

Fair Value of Financial Instruments – The carrying amounts of our financial instruments, including cash and cash equivalents, short-term investments, accounts receivable, accounts payable and accrued expenses, approximate fair value due to the short maturities of these financial instruments.

Advertising Costs – Advertising costs are expensed as incurred. Advertising costs were not material for all periods presented.

Recent Accounting Pronouncements – In December 2007, the FASB issued Statement No. 141 (Revised 2007), *Business Combinations* (“Statement No. 141R”), which establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree. This statement also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. Statement No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, and interim periods within those fiscal years. Statement No. 141R will become effective for our fiscal year beginning in January 2009. We are currently evaluating the effect the adoption of Statement No. 141R could have on our consolidated financial statements, if any.

In February 2007, the FASB issued Statement No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities* (“Statement No. 159”). Statement No. 159 expands the use of fair value measurement by permitting entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. This statement is effective for the first fiscal year that begins after November 15, 2007. This statement is effective for us beginning in our first quarter of fiscal 2008 which began on December 30, 2007. We have not yet determined whether we will elect to measure any items at fair value under Statement No. 159.

In September 2006, the FASB issued Statement No. 157, *Fair Value Measurements* (“Statement No. 157”), which defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. Statement No. 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. This statement is effective for financial statements issued for fiscal

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

years beginning after November 15, 2007, and interim periods within those fiscal years. This statement is effective for us beginning in our first quarter of fiscal 2008 which began on December 30, 2007. We are evaluating whether adoption of this statement will result in a change to our fair value measurements.

In September 2006, the SEC issued Staff Accounting Bulletin (“SAB”) No. 108, “*Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*” (“SAB 108”). SAB 108 requires analysis of misstatements using both an income statement (rollover) approach and a balance sheet (iron curtain) approach in assessing materiality and provides for a one-time cumulative effect transition adjustment. SAB 108 was effective for our fiscal year 2007. The adoption of SAB 108 had no impact on our results of operations, financial position or cash flows.

In September 2006, the FASB issued Statement No. 158, *Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans*, (an amendment of FASB Statements No. 87, 88, 106, and 132R) (“Statement No. 158”), that requires an employer to recognize in its statement of financial position an asset for a plan’s over funded status or a liability for a plan’s under funded status, measure a plan’s assets and its obligations that determine its funded status as of the end of the employer’s fiscal year (with limited exceptions), and recognize changes in the funded status of a defined benefit postretirement plan in the year in which the changes occur. We adopted the recognition provisions of Statement No. 158 in our December 30, 2006 financial statements. The incremental effect of applying Statement No. 158 on individual line items in our consolidated balance sheet as of December 30, 2006 are summarized as follows:

<i>(in thousands)</i>	Before Application of Statement 158	Application	After Application of Statement 158
Accrued retiree medical benefits	\$ 1,524	\$ 461	\$ 1,985
Accrued compensation and benefits (foreign pension obligation)	\$ 13,409	\$ 100	\$ 13,509
Deferred income taxes	\$ 4,570	\$ (177)	\$ 4,393
Total liabilities	\$ 54,367	\$ 384	\$ 54,751
Accumulated other comprehensive loss	\$ (30)	\$ (384)	\$ (414)
Total stockholders’ equity	\$ 271,972	\$ (384)	\$ 271,588

In June 2006, the FASB reached a consensus on Emerging Issues Task Force (“EITF”) Issue No. 06-3, *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross versus Net Presentation)* (“EITF 06-03”). EITF 06-3 indicates that the income statement presentation on either a gross basis or a net basis of the taxes within the scope of the issue is an accounting policy decision that should be disclosed. EITF 06-3 is effective for interim and annual periods beginning after December 15, 2006. The adoption of EITF 06-3 did not change our policy of presenting taxes within the scope of EITF 06-3 on a net basis and had no impact on our consolidated financial statements.

2. Discontinued Operations

In May 2006, we sold substantially all the assets of our metal detection equipment business, FRL. Our decision to sell FRL resulted from management’s determination that this industry segment was no longer a strategic fit within our organization. We are currently attempting to sell our FRL facility in Los Banos, California and believe the current fair value of the property is in excess of its \$0.5 million carrying value at December 29, 2007.

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A summary of key financial information of our discontinued operations is as follows:

<i>(in thousands)</i>	December 29, 2007	December 30, 2006	December 31, 2005
Net sales	\$ -	\$ 2,356	\$ 7,520
Loss from operations	\$ -	\$ (158)	\$ (381)
Loss on sale of metal detection equipment business	(66)	(1,387)	-
Loss from discontinued operations	(66)	(1,545)	(381)
Income tax benefit	(23)	(600)	(100)
Discontinued operations, net	\$ (43)	\$ (945)	\$ (281)

3. Strategic Technology Transactions, Goodwill and Other Intangible Assets

Tandberg Television AVS GmbH

On March 30, 2007, we purchased Tandberg Television AVS GmbH (“AVS”). The results of AVS’ operations have been included in our consolidated financial statements since that date. Pro forma results of operations have not been presented because the effect of the acquisition was not material. AVS, located near Frankfurt, Germany, designs, develops, manufactures and sells digital microwave transmitters, receivers and communications systems. This acquisition expands our digital microwave communications solutions, especially in high definition broadcast television and public safety and law enforcement applications.

The purchase price of this acquisition was approximately \$8.2 million, and was funded primarily by our cash reserves (\$8.0 million), other acquisition costs (\$0.2 million) and certain AVS liabilities assumed (\$2.3 million). The acquisition was considered a business in accordance with EITF 98-3, “*Determining Whether a Nonmonetary Transaction Involves Receipt of Productive Assets or of a Business*” (“EITF 98-3”), and the total cost of the acquisition was allocated to the assets acquired and liabilities assumed based on their estimated respective fair values, in accordance with FASB Statement No. 141, *Business Combinations*, (“Statement No. 141”). The acquisition was nontaxable and certain of the assets acquired, including goodwill and intangibles, will not be deductible for tax purposes. The goodwill was assigned to our microwave communications segment.

The allocation of purchase price to the acquired assets and assumed liabilities was as follows *(in thousands)*:

Current assets	\$ 4,344
Fixed assets	831
Intangible assets	2,190
Goodwill	3,140
Total assets acquired	10,505
Current liabilities assumed	(2,336)
Net assets acquired	\$ 8,169

Amounts allocated to intangible assets are being amortized on a straight-line basis over their useful lives of four years. Fluctuations in the exchange rate of the Euro, the functional currency of AVS, impact the U.S. dollar value of the goodwill and intangible assets in our consolidated financial statements and, as a result, future amortization of the acquired intangible assets may differ from the amounts presented below.

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unigen Acquisition

On December 29, 2005, we entered into an exclusive, perpetual, irrevocable, world-wide, royalty-free license for certain patents with Unisys Corporation (“Unisys”) for a one-time cash payment of \$5.0 million. On March 16, 2006, we purchased certain intellectual property, fixed assets, inventory and a customer contract of Unisys’ Unigen operation (“Unigen”). The results of Unigen’s operations have been included in our consolidated financial statements since that date. Unigen developed, manufactured and marketed advanced thermal solutions for use in semiconductor test and burn-in applications.

Included in the assets we acquired were the patents licensed from Unisys in December 2005 and, as a result, these two transactions have been combined for purposes of allocating the total purchase price to the assets acquired. The purchase price of this acquisition was approximately \$17.2 million, and was funded primarily by our cash reserves (\$7.7 million), cash previously paid in December 2005 for the patent license and a deposit on the acquisition (\$5.3 million), other acquisition costs (\$0.2 million) and certain Unigen liabilities assumed (\$0.1 million). We also recorded a \$4.0 million liability for amounts owed to Unisys for inventory we acquired. The acquisition was considered a business in accordance with EITF 98-3, and the total cost of the acquisition was allocated to the assets acquired and liabilities assumed based on their respective fair values in accordance with Statement No. 141. All assets will be fully deductible for tax purposes. The goodwill was assigned to our semiconductor equipment segment.

The allocation of purchase price to the acquired assets and assumed liabilities, was as follows (*in thousands*):

Current assets	\$	5,464
Fixed assets		1,522
Intangible assets		7,020
Goodwill		3,301
Total assets acquired		17,307
Current liabilities assumed		(142)
Net assets acquired	\$	<u>17,165</u>

Amounts allocated to intangible assets are being amortized on a straight-line basis over their estimated useful lives of five years. Pro forma results of operations have not been presented because the effect of the acquisition was not material.

KryoTech Acquisition

On May 6, 2005, we purchased substantially all the assets and operations of KryoTech, Inc. (“KryoTech”). The results of KryoTech’s operations have been included in the consolidated financial statements since that date. The purchase price of this acquisition was approximately \$3.6 million, and was funded primarily by our cash reserves (\$2.9 million). The purchase price also included the payment of the outstanding principal balance and accrued interest on the promissory note with KryoTech (\$0.5 million), other acquisition costs (\$0.2 million) and certain KryoTech liabilities assumed (\$0.5 million). The acquisition was considered a business in accordance with EITF 98-3, and the total cost of the acquisition was allocated to the assets acquired and liabilities assumed based on their respective fair values in accordance with Statement No. 141. All assets will be fully deductible for tax purposes. The goodwill was assigned to our semiconductor equipment segment.

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The allocation of the purchase price to the acquired assets and assumed liabilities, was as follows (*in thousands*):

Current assets	\$	740
Fixed assets		54
Intangible assets		1,950
Backlog		90
Goodwill		<u>1,257</u>
Total assets acquired		4,091
Current liabilities assumed		<u>(461)</u>
Net assets acquired	\$	<u><u>3,630</u></u>

Amounts allocated to other intangible assets are being amortized on a straight-line basis over their useful lives of three years. Pro forma results of operations have not been presented because the effect of the acquisition was not material.

Purchased intangible assets, subject to amortization, were as follows:

	December 29, 2007		December 30, 2006	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Unigen technology	\$ 7,020	\$ 2,517	\$ 7,020	\$ 1,096
KryoTech technology	1,950	1,730	1,950	1,082
AVS technology	2,409	437	-	-
	<u>\$ 11,379</u>	<u>\$ 4,684</u>	<u>\$ 8,970</u>	<u>\$ 2,178</u>

Amortization expense related to purchased intangible assets was approximately \$2.5 million, \$1.7 million and \$0.9 million in 2007, 2006 and 2005, respectively. As of December 29, 2007, we expect amortization expense in future periods to be as follows: 2008 – \$2,223,000; 2009 – \$2,006,000; 2010 – \$2,006,000 and 2011 – \$460,000.

4. Investments

Short-term investments by security type were as follows:

	2007			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Bank certificates of deposit	\$ 4,000	\$ -	\$ -	\$ 4,000
Asset-backed securities	33,807	36	37	33,806
Corporate debt securities	48,167	85	64	48,188
U.S. government agencies	1,798	9	-	1,807
Government-sponsored enterprise securities	4,998	38	-	5,036
	<u>\$ 92,770</u>	<u>\$ 168</u>	<u>\$ 101</u>	<u>\$ 92,837</u>

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

<i>(in thousands)</i>	2006			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Bank certificates of deposit	\$ 3,500	\$ -	\$ -	\$ 3,500
Asset-backed securities	12,871	4	3	12,872
Corporate debt securities	96,249	14	57	96,206
Government-sponsored enterprise securities	10,516	-	7	10,509
	<u>\$ 123,136</u>	<u>\$ 18</u>	<u>\$ 67</u>	<u>\$ 123,087</u>

Contractual maturities of short-term investments at December 29, 2007, were as follows:

<i>(in thousands)</i>	Amortized Cost	Estimated Fair Value
Due in one year or less	\$ 42,580	\$ 42,625
Due after one year through two years	16,383	16,406
Asset-backed securities not due at a single maturity date	33,807	33,806
	<u>\$ 92,770</u>	<u>\$ 92,837</u>

Gross realized gains and losses on sales of short-term investments are included in interest income and were not significant in any period.

5. Employee Benefit Plans

Retirement Plans – We have a voluntary defined contribution retirement 401(k) plan whereby we match contributions up to 4% of employee compensation. During 2007, 2006 and 2005 our contributions to the plan were approximately \$1.5 million, \$1.6 million and \$1.3 million, respectively. Certain of our foreign employees participate in defined benefit pension plans. The related expense and benefit obligation of these plans were not significant for any period presented.

Retiree Medical Benefits – We provide post-retirement health benefits to certain executives and directors under a noncontributory plan. The net periodic benefit cost was \$143,000, \$160,000 and \$130,000 in 2007, 2006 and 2005, respectively. We fund benefits as costs are incurred and as a result there are no plan assets.

The weighted average discount rate used in determining the accumulated post-retirement benefit obligation was 6.40% in 2007, 5.75% in 2006 and 5.5% in 2005. The weighted average discount rate used in determining the periodic benefit cost was 5.75% in 2007, 5.5% in 2006 and 6.0% in 2005. Annual rates of increase of the cost of health benefits were assumed to be 8.5% for 2008. These rates were then assumed to decrease 0.50% per year to 5.0% in 2015 and remain level thereafter. A 1% increase (decrease) in health care cost trend rates would increase (decrease) the 2007 net periodic benefit cost by approximately \$17,000 (\$15,000) and the accumulated post-retirement benefit obligation as of December 29, 2007, by approximately \$252,000 (\$212,000).

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table sets forth the post-retirement benefit obligation, funded status and the accrued liability recognized in the consolidated balance sheets.

<i>(in thousands)</i>	2007	2006
Accumulated post-retirement benefit obligation at beginning of year	\$ 1,985	\$ 1,900
Service cost	11	17
Interest cost	111	108
Actuarial (gain) loss	(184)	14
Benefits paid	<u>(73)</u>	<u>(54)</u>
Accumulated post-retirement benefit obligation at end of year	1,850	1,985
Plan assets at end of year	<u>-</u>	<u>-</u>
Funded status	(1,850)	(1,985)
Unrecognized net actuarial loss	<u>256</u>	<u>461</u>
Amount recognized prior to application of Statement No. 158	(1,594)	(1,524)
Transition obligation	<u>(256)</u>	<u>(461)</u>
Accrued liability recognized in the consolidated balance sheet	<u>\$ (1,850)</u>	<u>\$ (1,985)</u>

Deferred Compensation – The Cohu, Inc. Deferred Compensation Plan allows certain of our officers to defer a portion of their current compensation. We have purchased life insurance policies on the participants with Cohu as the named beneficiary. Participant contributions, distributions and investment earnings and losses are accumulated in a separate account for each participant. At December 29, 2007 and December 30, 2006, the payroll liability to participants, included in accrued compensation and benefits in the consolidated balance sheet, was approximately \$2.6 million and \$2.3 million, respectively and the cash surrender value of the related life insurance policies included in other current assets was approximately \$2.5 million and \$2.1 million, respectively.

Employee Stock Purchase Plan – The Cohu, Inc. 1997 Employee Stock Purchase Plan (“the Plan”) provides for the issuance of a maximum of 1,400,000 shares of our common stock. Under the Plan, eligible employees may purchase shares of common stock through payroll deductions. The price paid for the common stock is equal to 85% of the fair market value of our common stock on specified dates. In 2007, 2006, and 2005, 83,108, 73,338, and 77,611 shares, respectively, were issued under the Plan. At December 29, 2007, there were 602,019 shares reserved for issuance under the Plan.

Stock Options – Under our equity incentive plans, stock options may be granted to employees, consultants and outside directors to purchase a fixed number of shares of our common stock at prices not less than 100% of the fair market value at the date of grant. Options generally vest and become exercisable after one year or in four annual increments beginning one year after the grant date and expire five to ten years from the grant date. At December 29, 2007, 1,018,748 shares were available for future equity grants under the Cohu, Inc. 2005 Equity Incentive Plan. We have historically issued new shares of Cohu common stock upon share option exercise.

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Stock option activity under our share-based compensation plans was as follows:

<i>(in thousands, except per share data)</i>	2007		2006		2005	
	Shares	Wt. Avg. Ex. Price	Shares	Wt. Avg. Ex. Price	Shares	Wt. Avg. Ex. Price
Outstanding, beginning of year	2,430	\$ 15.88	2,504	\$ 15.66	3,054	\$ 14.95
Granted	219	\$ 15.98	298	\$ 16.48	261	\$ 17.81
Exercised	(222)	\$ 14.31	(247)	\$ 14.06	(700)	\$ 13.34
Canceled	(71)	\$ 17.96	(125)	\$ 16.56	(111)	\$ 15.69
Outstanding, end of year	<u>2,356</u>	\$ 15.97	<u>2,430</u>	\$ 15.88	<u>2,504</u>	\$ 15.66
Options exercisable at year end	1,693	\$ 15.83	1,529	\$ 15.48	1,342	\$ 15.12

The aggregate intrinsic value of options exercised during 2007, 2006 and 2005 was approximately \$1.1 million, \$2.7 million, and \$7.2 million, respectively. At December 29, 2007, the aggregate intrinsic value of options outstanding, vested and expected to vest and exercisable were each approximately \$1.7 million.

Information about stock options outstanding at December 29, 2007 is as follows *(options in thousands)*:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding	Approximate Remaining Life (Years)	Wt. Avg. Ex. Price	Number Exercisable	Wt. Avg. Ex. Price
\$ 7.69 - \$11.54	33	0.9	\$ 9.88	33	\$ 9.88
\$11.55 - \$17.33	1,665	6.2	\$ 14.81	1,074	\$ 14.20
\$17.34 - \$26.01	636	5.1	\$ 18.72	564	\$ 18.59
\$26.02 - \$38.81	<u>22</u>	2.1	\$ 33.54	<u>22</u>	\$ 33.54
	<u>2,356</u>	5.8	\$ 15.97	<u>1,693</u>	\$ 15.83

Restricted Stock Units – During 2006, we began issuing restricted stock units to certain employees and directors. Restricted stock units vest over either a one-year or a four-year period from the date of grant. Prior to vesting, restricted stock units do not have dividend equivalent rights, do not have voting rights and the shares underlying the restricted stock units are not considered issued and outstanding. Shares of our common stock will be issued on the date the restricted stock units vest.

Restricted stock unit activity under our share-based compensation plans was as follows:

<i>(in thousands, except per share data)</i>	2007		2006	
	Units	Weighted Average Grant-Date Fair Value	Units	Weighted Average Grant-Date Fair Value
Outstanding, beginning of year	253	\$15.56	-	-
Granted	210	\$15.00	259	\$15.56
Vested	(65)	\$15.60	-	-
Canceled	(25)	\$15.70	(6)	\$15.51
Outstanding, end of year	<u>373</u>	\$15.39	<u>253</u>	\$15.56

The total fair value of restricted stock units that vested during 2007 was approximately \$1.0 million.

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Share-based Compensation - We estimate the fair value of each share-based award on the grant date using the Black-Scholes valuation model. To facilitate our adoption of Statement No. 123R, we applied the provisions of SAB No. 107 in developing our methodologies to estimate our Black-Scholes model inputs for certain options. Option valuation models, including Black-Scholes, require the input of highly subjective assumptions, and changes in the assumptions used can materially affect the grant date fair value of an award. These assumptions include the risk-free rate of interest, expected dividend yield, expected volatility, and the expected life of the award. The risk-free rate of interest is based on the U.S. Treasury rates appropriate for the expected term of the award. Expected dividends are based, primarily, on historical factors related to our common stock. Expected volatility is based on historic, weekly stock price observations of our common stock during the period immediately preceding the share-based award grant that is equal in length to the award's expected term. We believe that historical volatility is the best estimate of future volatility. Due to a limited amount of historical option exercise data related to options with a five-year contractual term, we adopted SAB No. 107's simplified method for estimating the expected term of share-based awards granted during the first six months of fiscal 2006. During the third quarter of fiscal 2006, we granted options with a ten-year contractual term and utilized historical option exercise data for estimating the expected life of those awards. Statement No. 123R also requires that estimated forfeitures be included as a part of the grant date expense estimate. We used historical data to estimate expected employee behaviors related to option exercises and forfeitures. Prior to our adoption of Statement No. 123R, we reduced pro-forma share-based compensation expense, presented in the notes to our financial statements, for actual forfeitures as they occurred.

Share-based compensation expense related to restricted stock unit awards is calculated based on the market price of our common stock on the date of grant, reduced by the present value of dividends expected to be paid on our common stock prior to vesting of the restricted stock unit.

The following weighted average assumptions were used to value share-based awards granted:

<i>Employee Stock Purchase Plan</i>	2007	2006	2005
Dividend yield	1.3%	1.3%	1.0%
Expected volatility	34.7%	42.2%	41.0%
Risk-free interest rate	4.9%	4.7%	3.3%
Expected term of options	0.5 years	0.5 years	0.5 years
Weighted-average grant date fair value per share	\$4.63	\$5.48	\$4.19
<i>Employee Stock Options</i>	2007	2006	2005
Dividend yield	1.5%	1.4%	1.0%
Expected volatility	38.9%	48.1%	56.8%
Risk-free interest rate	3.9%	4.7%	3.8%
Expected term of options	4.5 years	4.5 years	4.0 years
Weighted-average grant date fair value per share	\$5.34	\$6.71	\$7.83
<i>Restricted Stock Units</i>	2007	2006	
Dividend yield	1.5%	1.4%	

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Reported share-based compensation is classified, in the consolidated financial statements, as follows:

<i>(in thousands)</i>	2007	2006	2005
Cost of sales	\$ 437	\$ 389	\$ -
Research and development	1,173	959	-
Selling, general and administrative	<u>2,468</u>	<u>2,211</u>	<u>-</u>
Total share-based compensation	4,078	3,559	-
Income tax benefit	<u>(979)</u>	<u>(531)</u>	<u>-</u>
Total share-based compensation, net of tax	<u>\$ 3,099</u>	<u>\$ 3,028</u>	<u>\$ -</u>

Prior to our adoption of Statement No. 123R, we presented all tax benefits resulting from the exercise of stock options as operating cash inflows in our consolidated statements of cash flows, in accordance with the provisions of EITF Issue No. 00-15, *Classification in the Statement of Cash Flows of the Income Tax Benefit Received by a Company upon Exercise of a Nonqualified Employee Stock Option*. Statement No. 123R requires the benefit of tax deductions in excess of the compensation cost recognized for those options to be classified as financing cash inflows rather than operating cash inflows, on a prospective basis.

At December 29, 2007, excluding a reduction for forfeitures, we had approximately \$3.7 million of pre-tax unrecognized compensation cost related to unvested stock options which is expected to be recognized over a weighted-average period of approximately 2.3 years.

At December 29, 2007, excluding a reduction for forfeitures, we had approximately \$5.7 million of pre-tax unrecognized compensation cost related to unvested restricted stock units which is expected to be recognized over a weighted-average period of approximately 3.3 years.

Prior to the first quarter of fiscal 2006, we accounted for share-based awards to employees under Accounting Principles Board Opinion Number 25, *Accounting for Stock Issued to Employees*, (“APB 25”). As a result of adopting Statement No. 123R our diluted net income per share for 2007 and 2006 were \$0.13 lower, respectively, than if we had continued to account for share-based compensation under APB 25. Under APB 25, no share-based employee compensation cost was reflected in our consolidated statements of income, as all options granted under our share-based compensation plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The pro forma information presented in the following table illustrates the effect on net income and net income per share if we had applied the fair value recognition provisions of FASB Statement No. 123, *Accounting for Share-based Compensation*, as amended by FASB Statement No. 148, *Accounting for Share-based Compensation – Transition and Disclosure*, to share-based employee compensation during 2005:

<i>(in thousands, except per share amounts)</i>	2005
Net income, as reported	\$ 33,974
Less: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effect	<u>(2,924)</u>
Pro forma net income	<u>\$ 31,050</u>
Net income per share:	
Basic – as reported	\$ 1.55
Basic – pro forma	\$ 1.42
Diluted – as reported	\$ 1.50
Diluted – pro forma	\$ 1.40

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

6. Line of Credit

In June 2007, we renewed our \$5.0 million unsecured bank line of credit bearing interest at the bank's prime rate. The line of credit will expire in July, 2008, and requires that we maintain specified minimum levels of net worth, limits the amount of our capital expenditures and requires us to meet certain other financial covenants. We are currently in compliance with these covenants. No borrowings were outstanding as of December 29, 2007 or December 30, 2006. At December 29, 2007, approximately \$1.3 million of the credit facility was allocated to standby letters of credit, leaving the balance of \$3.7 million available for future borrowings.

7. Income Taxes

Significant components of the provision (benefit) for income taxes were as follows:

<i>(in thousands)</i>	2007	2006	2005
Current:			
Federal	\$ 2,497	\$ 10,036	\$ 7,083
State	533	571	258
Foreign	483	(6)	121
Total current	<u>3,513</u>	<u>10,601</u>	<u>7,462</u>
Deferred:			
Federal	1,097	(1,814)	(2,398)
State	223	(987)	(4,564)
Foreign	(166)	-	-
Total deferred	<u>1,154</u>	<u>(2,801)</u>	<u>(6,962)</u>
	<u>\$ 4,667</u>	<u>\$ 7,800</u>	<u>\$ 500</u>

Income from continuing operations before income taxes consisted of the following:

<i>(in thousands)</i>	2007	2006	2005
Domestic	\$ 10,631	\$ 25,566	\$ 33,644
Foreign	2,057	860	1,111
Total	<u>\$ 12,688</u>	<u>\$ 26,426</u>	<u>\$ 34,755</u>

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting and tax purposes. Significant components of our deferred tax assets and liabilities were as follows:

<i>(in thousands)</i>	2007	2006
Deferred tax assets:		
Inventory, receivable and warranty reserves	\$ 15,680	\$ 16,084
Net operating loss carryforwards	202	304
Tax credit carryforwards	3,141	2,698
Accrued employee benefits	2,200	2,231
Deferred profit under SAB 104	1,874	3,789
Stock compensation	998	531
Acquisition basis differences	2,152	1,737
Capitalized research expenses	122	152
Book over tax depreciation	811	565
Gross deferred tax assets	<u>27,180</u>	<u>28,091</u>
Less valuation allowance	<u>(2,411)</u>	<u>(1,616)</u>
Total deferred tax assets	24,769	26,475
Deferred tax liabilities:		
Gain on facilities sale	2,983	2,983
Acquisition basis differences	4,001	3,330
Prepaid and other expenses	340	363
Total deferred tax liabilities	<u>7,324</u>	<u>6,676</u>
Net deferred tax assets	<u>\$ 17,445</u>	<u>\$ 19,799</u>

Realization of our deferred tax assets is based upon the weight of all available evidence, including such factors as our recent earnings history and expected future taxable income. We believe that it is more likely than not that the majority of these assets will be realized; however, ultimate realization could be negatively impacted by market conditions or other factors not currently known or anticipated. In accordance with Statement No. 109, net deferred tax assets are reduced by a valuation allowance if it is more likely than not that some or all of the deferred tax assets will not be realized. A valuation allowance of approximately \$2.4 million and \$1.6 million was provided on deferred tax assets at December 29, 2007 and December 30, 2006, respectively, for state tax credit and net operating loss carryforwards that, in the opinion of management, are more likely than not to expire before we can use them.

The reduction to the valuation allowance in 2005 was the result of our improved profitability and the corresponding increase in the amount of deferred tax assets considered realizable.

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The reconciliation of income tax computed at the U.S. federal statutory tax rate to the provision for income taxes is as follows:

<i>(in thousands)</i>	2007	2006	2005
Tax at U.S. statutory rate	\$ 4,441	\$ 9,249	\$ 12,164
State income taxes, net of federal tax benefit	(118)	160	110
Export sales and manufacturing tax benefits	(71)	(1,003)	(1,678)
Settlement of prior year tax returns	(75)	-	(3,159)
Adjustments to prior year tax accruals	79	83	(616)
Federal tax credits	(887)	(1,147)	(871)
Stock compensation on which no tax benefit provided	538	713	-
Change in valuation allowance	795	(168)	(5,089)
Foreign income taxed at different rates	(419)	(307)	(279)
Other - net	384	220	(82)
	<u>\$ 4,667</u>	<u>\$ 7,800</u>	<u>\$ 500</u>

State income taxes have been reduced by research tax credits totaling approximately \$849,000, \$886,000, and \$663,000 in 2007, 2006 and 2005, respectively.

In March, 2005 the Internal Revenue Service (“IRS”) completed a routine examination of our consolidated tax returns for the period 2000 through 2002. The examination resulted in no assessment related to our tax returns as filed. Consequently, approximately \$3.1 million of accrued taxes related to the examined years were reversed with a corresponding credit to income tax expense in the quarter ended March 26, 2005.

At December 29, 2007, we had state net operating loss carryforwards of approximately \$4.4 million that expire in various tax years through 2025. We also have state tax credit carryforwards of approximately \$5.9 million certain of which expire in various tax years beginning in 2014.

U.S. income taxes have not been provided on approximately \$3.9 million of accumulated undistributed earnings of certain foreign subsidiaries, as we currently intend to reinvest these earnings in operations outside the U.S.

We have derived significant tax benefits from research and development tax credits. The federal research and development tax credit expired on December 31, 2007 and it is uncertain when or if this tax credit will be extended. If the credit is not extended, our income tax expense and effective tax rate in future periods will be adversely impacted.

We adopted the provisions of FIN 48 on December 31, 2006, the first day of our 2007 fiscal year. As a result of the adoption of FIN 48, we recognized a decrease in the liability for unrecognized tax benefits of approximately \$423,000, a decrease in deferred tax assets of approximately \$381,000 and a corresponding increase in the December 31, 2006 balance of retained earnings of approximately \$42,000.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows *(in thousands)*:

Balance at December 31, 2006	\$ 3,692
Additions based on tax positions related to the current year	1,031
Additions for tax positions of prior years	171
Reductions as a result of a lapse of the applicable statute of limitations	(92)
Balance at December 29, 2007	<u>\$ 4,802</u>

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

If these unrecognized tax benefits are ultimately recognized, this amount, less the related federal benefit for state items of approximately \$882,000, would result in a reduction in our income tax expense and effective tax rate.

We recognize interest accrued related to unrecognized tax benefits, net of federal and state tax benefits, in income tax expense. Cohu had approximately \$317,000 and \$137,000 accrued for the payment of interest at December 29, 2007 and December 30, 2006, respectively. Interest expense recognized in 2007, 2006 and 2005 was approximately \$163,000, \$81,000 and \$49,000, respectively.

The Internal Revenue Service has examined our income tax returns through 2002, and the California Franchise Tax Board through 1999.

In October, 2007 the IRS commenced a routine examination of our U.S. income tax return for 2005. This examination is expected to be completed in 2008. We believe it is reasonably possible that a portion of our total unrecognized tax benefits will decrease in the next 12 months upon the conclusion of the examination or the lapse of the applicable statute of limitations. However, it is premature to assess the range or the nature of the reasonably possible changes to our unrecognized tax benefits.

8. Segment and Related Information

We have three reportable segments as defined by Statement No. 131. As discussed in Note 2, in May 2006, we sold substantially all the assets of FRL, which comprised our metal detection equipment segment and have presented financial information for this segment as discontinued operations. Our reportable segments are business units that offer different products and are managed separately because each business requires different technology and marketing strategies. Our semiconductor equipment segment, Delta Design, designs, manufactures and sells semiconductor equipment to semiconductor manufacturers and test subcontractors throughout the world and accounted for 84% of net sales in 2007. Our television camera segment, Cohu Electronics, designs, manufactures and sells closed circuit television cameras and systems to original equipment manufacturers, contractors and government agencies and accounted for 7% of net sales in 2007. Our other reportable segment is a microwave communications equipment company, Broadcast Microwave Services, which accounted for 9% of net sales in 2007.

The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies. We allocate resources and evaluate the performance of segments based on profit or loss from operations, excluding interest, corporate expenses and unusual gains or losses. Intersegment sales were not significant for any period.

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Financial information by industry segment is presented below.

<i>(in thousands)</i>	2007	2006	2005
<i>Net sales by segment:</i>

Total	<u>\$ 241,389</u>	<u>\$ 270,106</u>	<u>\$ 231,382</u>

9. Stockholder Rights Plan

In November, 1996, we adopted a Stockholder Rights Plan (“Rights Plan”) and declared a dividend distribution of one Preferred Stock Purchase Right (“Right”) for each share of common stock, payable to holders of record on December 3, 1996. Under the Rights Plan, each stockholder received one Right for each share of common stock owned. Each Right entitled the holder to buy one one-hundredth (1/100) of a share of Cohu’s Series A Preferred Stock for \$90. As a result of the two-for-one stock split in September, 1999, each share of common stock was associated with one-half of a Right entitling the holder to purchase one two-hundredth (1/200) of a share of Series A Preferred Stock for \$45. In November, 2006, we amended and restated our existing Rights Plan to extend its term to November 9, 2016 and make certain other changes. Pursuant to the amendment, to reflect the increase in the price of our common stock since the adoption of the Rights Plan, the exercise price of each Right was increased to \$190. Consequently, each one-half of a Right entitles the holder to purchase one two-hundredth (1/200) of a share of Series A Preferred Stock for \$95. The Rights are not presently exercisable and will only become exercisable following the occurrence of certain specified events. If these specified events occur, each Right will be adjusted to entitle its holder to receive, upon exercise, common stock having a value equal to two times the exercise price of the Right, or each Right will be adjusted to entitle its holder to receive common stock of the acquiring company having a value equal to two times the exercise price of the Right, depending on the circumstances. The Rights expire on November 9, 2016, and we may redeem them for \$0.001 per Right. The Rights do not have voting or dividend rights and, until they become exercisable, have no dilutive effect on our earnings per share.

10. Commitments and Contingencies

We lease certain of our facilities and equipment under non-cancelable operating leases. Rental expense for the years 2007, 2006 and 2005 was approximately \$1.6 million, \$1.5 million and \$1.3 million, respectively. Future minimum lease payments at December 29, 2007 are: 2008 - \$1,345,000; 2009 - \$376,000; 2010 - \$249,000; 2011 - \$214,000; and 2012 - \$108,000, totaling \$2,292,000.

We previously disclosed in our Form 10-Q for the quarter ended June 30, 2007 that in May, 2007 BMS received a subpoena from a grand jury seated in the Southern District of California, requesting the production

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

of certain documents related to BMS' export of microwave communications equipment. BMS completed production of documents responsive to the request in September 2007 and has fully cooperated. BMS has not been informed that it is a target of an investigation. As of the date of this report, it is premature to assess whether this matter will have any impact on the BMS business or results of operations.

In addition to the above matter, from time-to-time we are involved in various legal proceedings, examinations by various tax authorities and claims that have arisen in the ordinary course of our businesses. Although the outcome of such legal proceedings, claims and examinations cannot be predicted with certainty, we do not believe any such matters exist at this time that will have a material adverse effect on our financial position or results of our operations.

11. Guarantees

Changes in accrued warranty during the three-year period ended December 29, 2007 were as follows:

<i>(in thousands)</i>	2007	2006	2005
Beginning balance	\$ 8,118	\$ 4,561	\$ 4,157
Warranty accruals	8,690	13,198	7,155
Warranty payments	(10,198)	(9,670)	(7,212)
Warranty liability assumed	150	29	461
Ending balance	<u>\$ 6,760</u>	<u>\$ 8,118</u>	<u>\$ 4,561</u>

During the ordinary course of business, we provide standby letters of credit instruments to certain parties as required. At December 29, 2007, the maximum potential amount of future payments that we could be required to make under these standby letters of credit was approximately \$1.3 million. We have not recorded any liability in connection with these arrangements beyond that required to appropriately account for the underlying transaction being guaranteed. We do not believe, based on historical experience and information currently available, that it is probable that any amounts will be required to be paid under these arrangements.

12. Comprehensive Income (Loss)

Our accumulated other comprehensive income (loss) totaled approximately \$0.5 million and \$(0.4) million at December 29, 2007 and December 30, 2006, respectively, and was attributed to, net of income taxes where applicable, unrealized losses and gains on investments, adjustments resulting from the adoption of Statement No. 158, and, foreign currency adjustments resulting from the translation of certain accounts into U.S. dollars where the functional currency is the Euro.

A rollforward of amounts included in "Accumulated other comprehensive income (loss)", for 2007, 2006, and 2005, is as follows:

<i>(in thousands)</i>	Unrealized Investment Gain (Loss)	Postretirement Obligations	Foreign Currency Translation Adjustments	Accumulated Other Comprehensive Income (Loss)
Balance, December 31, 2004	\$ (160)	\$ -	\$ -	\$ (160)
Fiscal 2005 activity	(37)	-	-	(37)
Balance, December 31, 2005	(197)	-	-	(197)
Fiscal 2006 activity	167	(384)	-	(217)
Balance, December 30, 2006	(30)	(384)	-	(414)
Fiscal 2007 activity	77	123	700	900
Balance, December 29, 2007	<u>\$ 47</u>	<u>\$ (261)</u>	<u>\$ 700</u>	<u>\$ 486</u>

COHU, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

13. Related Party Transactions

James A. Donahue, President and CEO of Cohu, is a member of the Board of Directors of Standard Microsystems Corporation (“SMSC”), a customer of Delta Design. During 2007, 2006, and 2005, total sales to SMSC were approximately \$2.2 million, \$3.9 million, and \$0.7 million, respectively.

14. Quarterly Financial Data (unaudited)

Quarter		First (a)	Second (a)	Third (a)	Fourth (a)	Year
<i>(in thousands, except per share data)</i>						
Net sales:	2007	\$ 53,368	\$ 66,407	\$ 64,490	\$ 57,124	\$ 241,389
	2006	\$ 56,770	\$ 61,942	\$ 74,787	\$ 76,607	\$ 270,106
Gross profit:	2007	\$ 19,665	\$ 19,304	\$ 20,605	\$ 19,238	\$ 78,812
	2006	\$ 20,235	\$ 21,745	\$ 26,657	\$ 24,299	\$ 92,936
Income from continuing operations (b):	2007	\$ 1,716	\$ 2,040	\$ 2,235	\$ 2,030	\$ 8,021
	2006	\$ 3,585	\$ 5,192	\$ 4,498	\$ 5,351	\$ 18,626
Net income (b):	2007	\$ 1,691	\$ 2,022	\$ 2,235	\$ 2,030	\$ 7,978
	2006	\$ 3,423	\$ 4,720	\$ 4,197	\$ 5,341	\$ 17,681
Net income per share (c):						
Basic:						
Income from continuing operations	2007	\$ 0.07	\$ 0.09	\$ 0.10	\$ 0.09	\$ 0.35
	2006	\$ 0.16	\$ 0.23	\$ 0.20	\$ 0.24	\$ 0.82
Net income	2007	\$ 0.07	\$ 0.09	\$ 0.10	\$ 0.09	\$ 0.35
	2006	\$ 0.15	\$ 0.21	\$ 0.19	\$ 0.24	\$ 0.78
Diluted:						
Income from continuing operations	2007	\$ 0.07	\$ 0.09	\$ 0.10	\$ 0.09	\$ 0.34
	2006	\$ 0.16	\$ 0.23	\$ 0.19	\$ 0.23	\$ 0.81
Net income	2007	\$ 0.07	\$ 0.09	\$ 0.10	\$ 0.09	\$ 0.34
	2006	\$ 0.15	\$ 0.21	\$ 0.18	\$ 0.23	\$ 0.77

- (a) Each of the four quarters during 2007 was comprised of 13 weeks. The first quarter of 2006 contained 12 weeks, the second quarter of 2006 contained 13 weeks, the third quarter of 2006 contained 14 weeks and the fourth quarter of 2006 contained 13 weeks. As a result of the divestiture of FRL, we began reporting FRL as a discontinued operation for all periods presented in the second quarter of 2006 and, as a result, certain quarterly amounts will not agree to amounts presented in our previously filed Form 10-Qs.
- (b) In the fourth quarter of 2006 the income tax provision was reduced by federal R&D tax credits of approximately \$1.1 million.
- (c) The sum of the four quarters may not agree to the year total due to rounding within a quarter.

15. Subsequent Event

On January 31, 2008, we announced that the Cohu Board of Directors declared a \$0.06 per share cash dividend payable on April 25, 2008 to stockholders of record on March 11, 2008.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Cohu, Inc.

We have audited the accompanying consolidated balance sheets of Cohu, Inc. as of December 29, 2007 and December 30, 2006, and the related consolidated statements of income, stockholders' equity, and cash flows for each of the three years in the period ended December 29, 2007. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and schedule are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements and the schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Cohu, Inc. at December 29, 2007 and December 30, 2006, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 29, 2007, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, Cohu, Inc. adopted FASB Interpretation No. 48 "Accounting for Uncertainty in Income Taxes — an interpretation of FASB Statement No. 109," effective December 31, 2006 and Statement of Financial Accounting Standards No. 123(R), "Share-Based Payment," as revised, effective January 1, 2006.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Cohu, Inc.'s internal control over financial reporting as of December 29, 2007, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 12, 2008 expressed an unqualified opinion thereon.
